Logs from North America

AL INTERNATIONAL: 21889, 12/30, 1700 SIO:455 Heard on portable receiver while checking to see if outdoor location had power to DX the next morning. Signal as good as most any SWBC station! (Yoder,PA)

VOTN/RECH: 6285, 12/31, 0702+ ZZ Top music & address(Yoder,PA)

---: 6290.58, 0706* Song & off (Yoder,PA)

---: 6299.87, 0802-0818 IDs, think this was // to 7484.9? (Yoder,PA)

---: 7484.9, 0753-1003+ Strong, up to S4 or S5 "Good morning, you are listening to the Voice of the Netherlands." Country, techno, & pop music. Gave out phone number a LOT. Feedback through mics on many announcements. Nice to "finally" hear them--I've missed their New Year's show for about 10 years! (Yoder,PA)

Radio Mi Amigo Jingle station: 6275.07, 12/31, 0709-0905+ Good signal. A loop tape of old Radio Mi Amigo jingles. My favorite was the country one with "Yeeehaws!" (Yoder,PA)

RADIO BLACK ARROW: 6235.25, 12/31, 0715-0730* Nice signal! Mx by Animals & Jeff Lynne, Hi to Dave in the USA, thanked some listeners in Germany. "OK, this is the end of the program, hope you enjoyed everything." Said Foxfire was coming next. (Yoder,PA)

RADIO FOXFIRE: 6235.3, 12/31, *0730-0743+ Weaker than Black Arrow, but still not bad. "Hang on Sloopy", techno, "Don't You Forget About Me." Clear IDs, gave out radiofoxfire@hotmail.com address. (Yoder,PA)

RADIO MARABU: 6209.9, 12/31, 0824-0845+ Sounded like a lot of rap or hip-hop. Some talk seemed to be in Dutch or German. The signal wasn't bad (about S2), but the local buzz QRM really hurt my copying of this one. Thanks to Black Arrow for the ID. This was hanging in pretty long (still audible at 1000 UTC), so I'm guessing that this was relayed by a station in UK or Ireland...or maybe from a higher-powered Dutch station. (Yoder,PA)

UK RADIO: 6266.5, 12/31, 0853-0938+ Pretty good signal, but I didn't spend much time on it because there were so many other stations to try to copy. Clear ID, giving out phone number, dance music (Yoder,PA)

RADIO BLACK POWER: 6241.5, 12/31, 0912-0914* in QSO, heard mentions of Radio Foxfire, but not much else. ID per Foxfire (Yoder,PA)

Laser Hot Hits: 6218.9, 12/31, 0700-1000+ Good signal. Best after 0900. Lots of dance music--only noted in passing. Promos with laser sound effects (Yoder,PA)

Radio Blue Star, 6260, 2346-2352, 12/31 Abba Tune, EE ID, time check in UTC and frequency announced by man.Quick fade out. [Lobdell-MA]

Alfa Lima Intl, 6304.9, 0630-0800, 1/1, EEID phonetic IDs, talk, dance music. SIO: 131 [Lobdell-MA]

NEWS:

First of all: Happy New 2001 to you all!!

Second, as we have some new subscribers, please note that we are using D for Dutch and G for German. In german loglists, D are used for Deutch (german) and Hol for Dutch (in generally). Crap-conditions up here at my place, but heard some goodies. Lets hope for a good year on the FR-bands!

Transatlantic Radio had an accident in the studio. Instead of fireworks he got a fire in the Tx. TAR - the station with the hottest sound!

Radio Alfa Lima has increased the activity up on 21890 kHz. Due to the solar values, this should be a good place to enjoy AL.

Station operators please mind that the popular 6280 kHz channel is used by Israel Radio's external service daily 0500-0515 & 2000-2100 hrs UTC, at least until the end of February 2001. Massive signal in Central Europe.

Radio Geronimo from the UK is still looking for a DJ to record programs on tape. The address is 64 Brighton Road, LEICESTER. LE5 OHA. UK.

ECR/VoTN had some real luck! They were heard in Sydney, Australia!

6305 Radio Borderhunter, 0020-0026*, Usual instr. mx w/M anncr voice-over giving IDs, mailing and e-mail addrs, tlk, and off at 0026. So just lucky I caught it!! Poor w/SSB monkey-chatter QRM, but somewhat readable. Thought it was Alfa Lima at first. (Valko 7 Jan.)

NEWS:

Howdy folks! Just letting you know that we empty the box and send out all reception reports to the stations this week. Awful conditions, should not be mentioned, but I do it anyway. Take care, see ya all next week.

In spring WFCC, <http://wcmr.8k.com>, will start with live internet transmissions.

JRRI now using 6235 kHz, too much free radio stations crowding up on 6240 even when we are on air, Presently using 60 W, 160 W transmitter being upgraded.

SUPERSTATION/TONY STEVENS TEST TRANSMISSION has now found a final name for its broadcasts: since the X-mas days the station can be heard as RADIO MI AMIGO.

Contact address is: c/o UK Radio, P.O. Box 53, Bilston, West Midlands, WV14 6YS, United Kingdom.

Radio Mi Amigo also has a studio hotline: 0044/787/9263178.

TTS-Mediapro is pleased to announce . . .

THE 21st CENTURY OFFSHORE RADIO POLL

What if . . . The European Union were to offer a pan European offshore broadcasting licence starting in 2001 to one of the historic offshore stations in recognition of their contribution to the development of European broadcasting?

What if . . . Radio enthusiasts could choose who will get the licence by popular vote?

Who would you vote for?

To place your vote go to <http://www.tts-mediapro.co.uk> and make your choice!

At the end of 2001 the results will be presented to the EU, with a request for such a licence to be granted.

Logs from the US of A:

6274.2 UNID., R. Caravan??, 0732-0806, Mostly unrecognizable apparent New Wave type music but was able to recognize "The More You Live, the More You Love" by A Flock of Seagulls at t/in. M announcer occasionally in European continental lang. (didn't sound like German or Dutch). Around 0738 possible ID sounded like "...R. Caravan, P.O. Box 57...". Later in the broadcast, what sounded like a mention of "...This is for USA...". Poor to fair at best w/horrible pulsing UTE QRM right on the freq. Would've been a nice reception if not for the UTE. Voice level higher than music. Seemed to just disappear at 0806. Any ideas anyone??? (Valko 14 Jan.)

7444.67 Ozone R., 0830-0855, "I Want You to Want Me" by Cheap Trick, "Barracuda" by Heart. Announcements by deep-voiced man along with what sounded like the Ozone announcer from what I can remember. Possible address and dedication, and mention of "CD" pertaining to upcoming song. Tuned out at 0855 when Taiwan came on, but the signal was still there at 0914 recheck. Weak and best at t/in of course. (Valko 14 Jan.)

6305 Alfa Lima Int., 0310-0316, Rap music, greetings and ID from Alfred at 0313 and request for reception reports and e-mail messages. E-mail and regular mail addrs. Fairly strong w/unusual thunderstorm-like QRN static crashes at this time. Still on at 0735, and still barely getting audio at 0932 when announcement by Alfred!!! (Valko 14 Jan.)

6266.48 Obviously UK R., but just to weak to copy any details. Almost strong enough to recognize songs. 0820+. (Valko 14 Jan.)

6218.92 Laser Hot Hits, 0844-0853, Song by Steve Miller, usual "Laser" SFX and announcement. Awful SSB traffic QRM. Do you guys in Europe get this SSB traffic?? Ruins the signal. (Valko 14 Jan.)

6210.87 UNID. 0925, Found a signal here, but too late. Weak but definitely there. Must've been post-0900 sign-on as it wasn't there on early scans. (Valko 14 Jan.)

6259.3 Just a weak het at 0901. Still there at 0924. Don't know if this was actually a station or just something else. (Valko 14 Jan.)

NEWS:

Only nocie here at SRS-HQ. Heard a weak signal from AL Int. Very good Cx up on VHF and higher, this might have caused reduced Cx on SW in my case. Stay tuned, see ya next week / SRS Editor

RADIO BENELUX gives newcomer music bands & groups a chance. Your demo tapes might be aired over Benelux. Just send your tapes & infos to Radio Benelux, PB 73, NL-7160 AB, Neede, HOLLAND

About the start of WFCC:

It will be later because that the provider told the op that the high speed (being necessary for audio live) will be introduced in Summer of this year, this is 90 % sure. Possibly also shortwave transmissions with 250kWatts.

Radio East Side is one year on shortwave now ! The first transmission was on air on the 08(th) and 09(th) of January 2000 on 6261 kHz . We celebrate the first anniversary with an special two hour transmission at the end of this month on the 48 m Band ! So listen out for "East Germany`s No.1" ...

They also now has an own web-page: <http://www.radio-east-side.online.de>.

Only contact address for the station is now c/o SRS-Germany, Postfach 11 36, 06201 Merseburg, Germany. The adress in Dortmund is no longer valid. Radio East Side will be on air this Saturday (January 20th) via relay from South-America . Frequency : 11440 kHz mode : USB , time : 21.30 UTC

STARSHINE AM is a joint venture of Matthias from Radio Sunshine Classic Rock (which closed down in 96) and Rudi of Radio Stardust. So they announced the postal address of Radio Stardust at FRI Dortmund and the E-mail of Radio Stardust : radio-stardust@gmx.de. It's not clear, if more programmes will follow for this one. Not to be mixed up with Starshine Radio, Wuppertal.

Radio DEVALON International is completely independent of Radio CLCG. Its DJ and Station-'Manager' is Steve Young. This station has nothing to do with Radio CLCG or Wilfried Mayer anymore ! Steve Young for Radio CLCG and Radio Devalon Int. (own station !), resp.

PIRATES SOUTH AMERICA:

January 20, 2001 (Saturday)

11440U Radio East Side (via Cochiguaz), 2239+, ID with jingle, then Abba music, also ID as "...today via relay from somewhere in South America, this is Radio East Side.... my name is Alex Warner.....", SIO: 444.

11440U Radio Torenvalk (via Cochiguaz), 2203+, ID as "Radio Tooooooreeeenvalk" then music, IDs in EE, GM & Dutch. SIO: 444.

January 21, 2001 (Sunday)

11440 USB Radio East Side, (via Radio Cochiguaz), 0010 - 0030, English, musical program, ID "you are listening Radio East Side", SIO 232,

11440U Radio Torenvalk (via Cochiguaz), 0030+0132+, same programme, at 0154 ads of Radio Laguna CD, then heard the more popular song of Radio Torenvalk operator, music. SIO: 343-232

11440U Radio Cochiguaz, 0202+ El Condor Pasa, ID's in EE, SS & Quechua ??, then s/off at 0205. SIO: 343.

Euro-Pirates, as heard in North America

UNION RADIO: 6210, 0658-0715 U2 "Wide Awake in America" mentioned "from the Netherlands." In there, but nothing great. (Yoder,PA)

FRS HOLLAND: 6290.3-6291.5v, 0718-0730 Nice signal, but quickly drifting up. Nice promo, Said last on in Dec. 2000 & hoped to be heard in NA again, "You Won't See me" The Beatles. "Free Radio Service Holland will be closing down in about two minutes...it's about 7:30 Central UT time..." Gave out mailing address & e-mail addresses "...a very nice weekend, a very nice Sunday. Bye" Off immediately. Nice to finally hear them well after about 10 years of trying. (Yoder,PA)

UNION RADIO: 6210, 0740-0745* SIO:454 Listened to in AM wide mode through the speaker! Pop & schlager (sp?) music. Off with OM echo "Until next time, this is Union Radio closing down." (Yoder,PA)

RADIO PERFEKT: 6301.57 0753-0806 Pop/rock music, some oldies, sounded like giving out phone number (Yoder,PA)

XTC: 6206.9, 0812-0825 Faint signal, pop & dance music. Heard DJ say "The song is called..." ID per Hans-Joachim. (Yoder,PA)

RADIO WONDERFUL: 6310 0830-0853 Decent signal. 1 clear ID. Lots of soul music, "...free radio station on shortwave in the 48-meter band..." Thought I heard an address with "10112" in it. Lots of talk in either Dutch or German. At 0844, announcer talked for a long time & gave out a bunch of numbers--a DX program? (Yoder,PA)

DELTA LIMA RADIO: 6270, 0906-0915 I heard some audio in here faintly, so I started recording the tape and went outside to clear the snow off the car (to make my great escape). ID per Hans-Joachim. He said it was announcing 10 watts. Any ideas about addresses? (Yoder,PA)

Unid: 6230, 0650-0800+ Heard man talking for long periods of time. Weak and was too caught up tuning in the others to spend any time here. Transmitter seemed to be FMing, with frequency varying on audio peaks. (Yoder,PA)

NEWS:

Derek Taylor, DPRS, has retired now, his daughter does the DPRS-service, e-mail is dprs2001@bushinternet.com.

EAST ROCK Radio (via SRS Germany) has been heard for the first time via the IRRS, until now it has been only heard (more or less) via Jolly Roger Radio. The OP played of course mainly East German Rock music. Since he spent some days in the hospital you may wish to send him your best wishes via eastrockradio@surfeu.de

A new misterious station herad on sunday was Radio ROWBOX. Nothing else then music and different kind of station announcements have been herd, but in the last part of the px the OP also gave his e-mail as radiatorowbox@hotmail.com.

A Radio ACTION from Holland has been heard with Hotline and Box 94, NL- 7038 ZH Zeddum announcements. Its not yet clear if this is the same action as that one that use Box 20 in Zeddum some years ago. That one was the same as Heideroosje on MW ...

We got a letter this weekend;

Do you realise that the authorities responisble for raiding free radio stations read your loggings... It is a bad thing to give so much exact dates, times and evidence of station output, as it does definitely lead to to these stations being raided. This has happened to four stations in the past 12 months, and the DTI in GB have said that a lot of their information came from websites such as yours. Only give vague dates and times please. From all the Antares, Argus, Ram220 and Pipeline staff

Answer:

This has been up before. I am not aware of any station, except Radio UK, that has been raided during the last 12 months. This raid had nothing to do with SRSnews. The authorities gets their info via neighbours and others who complains about radio-sound everywhere in the house. As FM and MW are more sensitive in UK, I guess that those being raided where FM or MW-pirates. SRSnews does not include logs from FM or MW stations.

-- --

From Gary Stevans (BBMS/Ozone) we got this interesting list:

Was thinking the group might like to know of the frequencies that have been used by pirates/out banders.

76 mb 3.880-3.999: Very popular even with low power not a great deal of activity only 4 to 5 stations of a weekend a useable nighttime frequency for Laser Hot Hits on 3.935.

85 metre communications band 3.450-3.495 Khz lsb: The Echo Charlie Band [CB type band] calling channel 3.475 lsb band is about 25 Khz either side of central frequency, occasional traffic UK, Germany and Holland, strong QRM at times, utility traffic, take care.

52 mb 5.700-5.875: The 52 metre band used when the 48 mb is either full of stations or not propagating very well second hobby pirate broadcasting band.

48 mb 6.200-6.400 (and beyond): The 48 metre band, this is the big one lots of stations on at the weekends and holidays etc from most of Europe and the UK plus a few from Scandinavia, with very little power good results can be achieved, the main Sunday morning hobby pirate broadcast band.

45 mb 6.600-6.700 Khz lsb: This is known as the Echo Charlie range of frequencies with the calling frequency of 6670 lsb, good band for European traffic. Lots of stations from the UK, Germany, France, Netherlands, Belgium. Stations running with powers as low as 2 to 5 watts, also used by utility stations, never go to usb.

43 mb 6.940-6.955: This is the main US pirate band where most of the operation is in side band.

42 mb 7.395-7.555: Propagating sometimes better than the 48 mb but only 3 to 4 stations using this band, also a good DX band after sunset. The outsider to this frequency range is the IRRS to be found on 7.120 Italian Radio Relay Service, these put to air pirate tapes sent by hobby broadcasters, look for Laser Hot Hits on 7.455 and Radio Ozone/BBMS on 7.445.

32 mb 9.180-9.350 Khz: The 32 mb is something of a new band, but has been experimented with.

25 mb 11.400-11.550 Khz: The 25 mb mainly 11.404v has been used, good daylight DX band with the odd station as low as 10.355.

22 mb communications band: The 22 mb has also been experimented with, channels such as 12.105 12.130 12.160 up to 12.256v with any clear spots in between.

21 mb communications band 13.630-13.995 Khz AM/usb: The 13 mb has transcontinental traffic only occasionally used 13.630 - 13.960 is the main hobby pirate broadcasting range, there is also an International CB band where the calling frequency is 13.995 usb.

18 mb 15.550-15.835 (and lower): The 18 mb for pirates runs from 15.500 to 15.835 but channels below this have been used such as 15.025 and 15.070 MHz, sometimes excellent for daylight DX.

21 MHZ these three frequencies have been used 21.450 21.565 and 21.890.

CB frequencies: 26.285 International calling frequency lower section usb. 26.740 International packet radio network lsb. 26.965 local packet radio network FM. 27.500 CW/RTTY frequency lsb. 27.555 International calling frequency high section usb. 27.700 slow scan TV.

60 cm UHF 482-487 MHz FM wide: In the Netherlands 60cm has been very poplar, the calling frequency there being 485.500, low power and many miles, on a few milliwatts.

21 cm SHF 1300-1350 MHz: Old satellite receivers are useful for this range with 13305 MHz as the calling frequency, Fast Scan TV. Studio links.

Medium Wave low end 1.625-1.670: Most popular evening band with relatively low power 100 watts or less, I think the Dutch lead the World in pirating this section with their barrel organ music, but Germany-Belgium-Greece-Spain-Malta- and the former Yugoslavia have used this range, also try 1.350 1.475 and 1.593 Khz powers up to 3 kW have been used mainly via army/government surplus equipment.

I hope you have found this of interest, please feel free to correct any omissions. Feed back would be helpful.

Logs from Argentina:

January 20th :

11470 KHz. (USB) Radio East Side (via Radio Cochiguaz). 2130-2200. 20 de Enero. Programa en Ingles. Apertura de emision a las 2130, identificacion. Anuncios, comentarios y música. Cierre de emision a las 2200. 23412.

11470 KHz. (USB) Radio Torenavalk (via Radio Cochiguaz). 2200-2230. 20 de Enero. Programa en Inglés. Apertura de emision a las 2200, identificacion. Anuncios y comentarios. Musica. Cierre de emision a las 2230. 23322.

Logs from the USA showing reception of Euro-pirates January 28th

UNID: 6205.01, 0846-0854* Some pop music, "Smokin' in the Boys' Room" by Motley Crue. Weak, off mid-song. (Yoder,PA)

RADIO BORDERHUNTER: 6210, 0718-0757 Nice signal with music by CCR, The Romantics, Village People, etc. (Yoder,PA / Valko)

LASER HOT HITS: 6220, 0752-0811+ decent signal early, but much stronger around 0900. Promo "Chris Williams is the man who plays the music." New crystal? Frequency right on 6220 now. (Yoder,PA/ Valko)

6235 UNID.(JRRI??) Someone here at 0900 with very weak audio, but definitely a station. Anyone know who this was?? (Valko 28 Jan.)

6241.76 East Side R., 0930-0933, Electronic voice jingles, Dance mx with many presumably canned quick IDs by man. Mentions of Germany. It sounded like a routine just prior to the start of a program. Kind of weak, but readable. (Valko 28 Jan.)

XTC: 6243.77, 0736-0832+ Weak with heterodynes and some utility QRM. Hi to North American DXers, lots of phonetics, ID as Xenon Transmitting Company (Yoder,PA / Valko)

UK RADIO: 6266.5, 0836-0929 Good signal, was busy with other signals to listen long here (Yoder,PA / Valko)

WEST COAST RADIO: 6267.87, 0822+ Very bad utility & SSB QRM. Could pull out music, but not much else. Thanks to Hans-Joachim for ID (Yoder,PA)

ASTORIA RADIO: 6273.9, 0700-0725 Decent signal, but was getting absolutely hammered by utility stations here. Heard Jefferson Airplane "Somebody to Love," but that's it. Tuned back through & could heard that it was in there, but still getting blasted. Thanks to Hans-Joachim for ID (Yoder,PA / Valko 28 Jan.)

RADIO LIKEDEELER: 6279.7, around 0828-0900. In there, but too weak to get much anything. ID per Hans-Joachim (Yoder,PA / Valko)

ALFA LIMA INTERNATIONAL: 6289.9, around 0730. Strong. ID on initial tune through the band, but was gone when I tuned back through (Yoder,PA)

RADIO NOVA INTERNATIONAL: 6290.85, 0815-0900 Pretty weak most of the time, but peaked up for a clear ID & promo: "If there's anything you don't like, please let us know; if there's anything you do like, please let us know." Phone number had 07940 in it. (Yoder, PA / Valko)

UNION RADIO: 6305.8: 0750-0823 Strong, but I didn't get a chance to listen much (Yoder,PA / Valko)

7486.8 R. Black Arrow (pres.), 0726-0732, Instru. mx similar to Blue Man Group, into EG Dance song, and then "Drivers Seat" by Sniff n the Tears. No announce-ments heard but then again I didn't stay with it long enough. Fairly good. Freq suddenly dropped down from 7486.86 to 7486.52 at 0733. Was gone at 0751 recheck. (Valko 28 Jan.)

7479.73 BBMS, 0751-0755, Talk by what sounded like Gary Stevans over mx. Some Pop mx. Very weak oddly enough. Fady as well. Drifted up to 7479.85 by 0812 recheck with live stand-up anecdotal comedian act by Irish-sounding comedian. Good at this time. Still in when I checked back home at 1015!! (Valko / Yoder,PA on 7489.85 @ 0910??)

NEWS:

Martin received 2(!) letters with logs - I received 10! Pse check the line telling who's the editor. 73i's / Jonny

>from Spain : poor signals as usual, and propagation closing after 0900 aprox.

More from DPRS : Correct, the QSL bureau is closed. But the mail forward works. There doesn't really need to be a list [of stations connected to DPRS] as ALL *Dutch Medium Wave pirates can be contacted through DPRS. (* providing they give the correct name of a pirate that actually exists and not a guess name, or one they think they've heard. DPRS has even been castigated in the past for NOT KNOWING WHO THEY MEANT !!!)

Radio COCHIGUAZ celebrates its 4th birthday on February 1st, 2001. That are 4 years of pirate activities on the free bands broadcasting the Andean sounds from somewhere in the South American Andes. They manifest their thankfulness to the listeners, and also to all the free radio stations that have been in contact with them during this 4 years of activities on shortwave. Radio COCHIGUAZ will continue hosting the pirate flag here in South America.

The Box Operator for MUSIC ISLAND RADIO from Byelorussia (has been heard with old tapes via IRRS last year) tries to reach the the OP of the station in order to deliver the received reception reports.

RealAudio-recordings of several pirates heard this weekend can be found at the Free radio Europew FR page at <http://www.Free-Radio.de>.

After a short chat with op Fossy of RADIO POPCORN yesterday, we can inform you that the station will return after a 6 years rest. Address probably via SRS.

Radio Alfa Lima will be on air the 4th of Feb. with a px on 21890 kHz. Starting around 08.00 UTC. Great signals a cross the world - tune in!

Report from the U.S. of A.

6235.43 R. Foxfire, 0656-0829, "Handle Me With Care" by the Traveling Wilburys, Jurjen in EG at 0702 with IDs, e-mail addr, and mentions of America, phone sounding like 00031-62910009. "Follow You Follow Me" by Genesis which ended at 0707, brief deadair, then started again in the middle of the song. Mentioned getting a phone call, ID, e-mail addr. More music. Nice ID, addr, and phone at at 0752 recheck, and song "You Got It" by Roy Orbison at another recheck at 0821 followed by announcements again. Very difficult to copy by 0829. Nice signal earlier. (Valko 4 Feb.)

6210 Union R., 0715-0717 , M in Dutch but short ID "OK, you're tuned to Union R. from the Netherlands, ?? from us", into a Pop/Rock song I couldn't recognize. Good and nearly 100% copy. (Valko 4 Feb.)

6399.58 Astoria R., 0718-0720, Pop song, Quick greeting/good morning announcement by man, into "Brother Louie" by Stories, another announcement "From the Netherlands, you're listening to free radio from the Netherlands, Astoria R. with the P.O. Box number 663...." and continued song. Still in at 0809 recheck. Fair and easily readable. (Valko 4 Feb.)

6211.92 UNID. 0724-0736, Man in EG with what sounded like an ID (while I was tuning in). Program of all Dance music with occasional brief announcements during the songs at 0725, 0728, 0730, and 0735. Several mentions of "radio" during the announcement at 0728. There was a jingle at 0733 mentioning "free radio" and possibly ending with "...U.K." but not sure. Seemed strong enough, but there was too much Union R. 6210 QRM. Rechecked at 0818 and heard a carrier but no audio. Union R. was off by then. 6211.92 was gone at 0831 recheck. Anyone know who this was?? (Valko 4 Feb.)

6280.62 UNID. 0732-0752, Pop/Rock music at tune-in, slow song, instru. dance music sounding like from the 70's (flute prominent) with man announcer with long voice-over in non-EG sounding language 0742-0745. Possible addr given as I noted phonetics "...Echo Uniform...Alpha Echo...". Into a couple unfamiliar Pop songs. When I returned at 0810, I recognized "Stairway to Heaven" by Led Zeppelin. Much too weak to copy announcements. (Valko 4 Feb.)

5805.44 RFL 0754, Man in EG, and into music. Quite weak and just way too much slop-over QRM from 5825. (Valko 4 Feb.)

7474.15 BBMS/Ozone, 0756-0803, Greeting listeners/acknowledging reports, mentioned Gary Stevans. Said was old "Older than you think"!! Mentioned SRS News. Into "Get Off My Cloud" by The Rolling Stones. Came back at 0803 but a UTE started up then. Returned from 0941-0952 and heard Pop music with song announcements. Still in and readable, but not quite as strong as earlier. Clear. Very laid back programming. (Valko 4 Feb.)

6266.6 U.K. Radio, 0833-0850, Many songs by The Bee Gees (they sure do like them!!) and one by Blondie. Man host with song announcements, many IDs, Wolverhampton addr. Canned jingle at 0849. Not very strong but OK. Wasn't on earlier in checks just before and after 0800, so probably signed on closer to 0830. Drifted down from 6266.61 - 6266.54 by tune-out. Nothing heard on 15070 or 6935. (Valko 4 Feb.)

6309.73 UNID. 0851-0921, Pop music program hosted by 2 men in what sounded like German. 0855 gave ID, phone number ending with mention of Germany. Then other man mentioned "...dot com...", and then what sounded like an address. "Chiquitita" by Abba. More talk and music. I tuned out for 4 minutes from 0905 because of UTE QRM. Fairly decent on brief peaks early, but fading by 0920. Freq drifted up slowly from 6309.71 - .78. East Side maybe?? (Valko 4 Feb.)

6289.91 Alfa Lima Int. (pres.) 0907-0930, Mixing with the pulsing UTE here at tune-in. No QRM at 0923 retune. Talk with a phone caller, Dutch folk-like song, mentioned "...International, good morning" when taking another phone call at 0929. Sounded like Alfred. Weak and fading. (Valko 4 Feb.)

12256.46 Wrekin R. Int. (tent.) 0922, Extremely weak but could get bits of mx. Came back later and could just barely detect a carrier. No chance. They must beam north-south. (Valko 4 Feb.)

6220 Laser Hot Hits Presume this was the one all morning, very strong. 7455 blocked by strong UTE. I thought I heard West Side R. IDs on this last week. Many Laser IDs upon replay of the disc. (Valko 4 Feb.)

21884.88 Alfa Lima Int. 1422-1430, Music by Abba, Alfred with ID and talk abt broadcasting earlier this morning. "You're listening to Alfa Lima Int., get out of bed and stay tuned to the Alfa Lima Int. ?? in the Netherlands". Weaker than it has been here. (Valko 4 Feb.)

NEWS:

Seems like some stations are testing the internet as provider for px. Less illegal, but still. Transatlantic has sent out letters for some time telling me to listen out on <http://166.90.148.115:14364/> with WinAmp or RealPlayer.

Did so today, and a quite nice "signal". Later this day, a letter from Starshine was telling me that he was setting up live BC via the internet. Just go to www.365live.com and search for Starshine or try to connect to <http://166.90.143.158:11778>. Only up when Kim is, so...He told me that he was going to test this Wednesday around 17.10 UTC with a 30 minutes px. More details if you write to kim.hawk@usa.net. Poor cx as usual here, better elsewhere. The solar cycle is going down. Soon will the high freqs be as poor as they used to be, so hurry up with tests.

Within the px of AL a listener announced the first px of URANIAN(?) TRANSMITTING COMPANY for next Sunday at 1400 UTC on 6200

The London pirate Radio Free London is threatening to close down after internal squabbles, RFL has existed on and off since 1968 under different groups. RFL has been a regular feature on London's radio dial on 819 and 5805kHz for many years.

7459.5	Laser Hot Hits	0936-0947	Pop and instru. music, Chris Williams.
7480.1	R. Benelux	0948-1000	Definitely here with Pop music.

NEWS:

Your editor had everything set up for some pirate-DX-ing this Sunday morning, except from RECH with nice, but fading, signal - only noise was heard. Has anyone a correct address to radio noise? ;-) Many logs from friends I have not heard from over a longer period! Good DX, 73is / Jonny

RADIO NORTHSEA WORLD SERVICE has been testing a lot lately on 6206 kHz. The operator said that it may take some weeks or even months before the reintroduction of regular transmissions. The station had officially closed down October 30th, 2000. Address: c/o Postfach 2209, 77612 Offenburg, Germany.

RADIO PIRAÑA INTERNATIONAL want to revive very soon starting again its activities probably from next May 2001 on the usual SAM free bands. Jorge Garcia, its operator also want to answer to all who wrote to RPI in the past, but, there are problems because all the information stored and such as many reports have been received electronically, have been lost unfortunately because the computer was melted some months ago with all the information inside. If you have not received a answer up to now from RPI, please send again their report and your postal fees will be returned by Jorge Garcia with IRC's. (International Reply Coupons). Its maildrop is: RPI, Casilla 159, Santiago 14, CHILE. Any comment, pls only to the RPI. e-mail:rpi@writeme.com Signed: Jorge Garcia, operator of RPI.

Here a message from radio Tonair our webpages is closed because the government is reading our pages and using the links on our site to close other radio stations in the Netherlands this information is coming from my nedstat counter who i can read the information on it and this is the 4 times they visit our pages. (ministerie van verkeer en waterstaat in den den Haag) So i have decided to close this service to make it difficult for the gpo to find the stations on the net and also the information from our stations radio Tonair and Torenavalk. When the service is coming back i will send again a email to you. Greetings from radio Tonair.

The postoffice box 21 7010 AA Gaanderen is not more in use you can only reach me by email. Greetings tonair. (Radiotonair@hotmail.com)

Seldom heard Radio was the unid via IRRS last weekend. If you get a chance to listen to "Seldom heard Radio," he would be most pleased to hear your reaction. Address: Seldom heard Radio,36 West Main Street,Warner,New Hampshire 03278 USA.

A new station seems to be Radio Victoria. The station claims to broadcast from the South of the Netherlands. No postal address was mentioned, but the operator asks for reception reports to his E-mail-address radiovictoria@planet.nl .

NEWS:

It has recently been reported that Disc Jockey Tony Allen is seriously ill at a London Hospital. Tony started in pirate radio on "Radio Scotland" broadcast from a former lightship called the Comet during 1966-67. He also worked as a TV continuity announcer, but became a well known voice on Radio North Sea International during 1971 and later on Radio Caroline. Radio Caroline's station manager Peter Moore says he is happy to deliver and cards and things to him. Chocolates and other candies may not be a good idea as I believe he is suffering from throat cancer.

Tony Allen, c/o Radio Caroline, 426 Archway Road, London N6 4JH. mail@radiocaroline.co.uk

Geronimo is still looking for a DJ that would like to do a one hour rock show every month or so. New QSL,s now available and very nice they are too!!! Address: 64, Brighton Road.

Radio Nova International (Terry Philips) has been testing on 9290 kHz. Address: 64 Brighton Road, Leicester, LE5 OHA, United Kingdom
E-mail address: confused@onmail.co.uk

BBMS/Ozone and Benelux are sharing 7480 from now. Listen out every Sunday morning to this stations on 41m! If there is nothing@your side, buy a new rx!

The Radio RECHARGE tape has been played by Radio 510 with the additional announcemenmt, that the station does not not exist (and following does not verify) any more. But reports for this px will be verified by Radio 510 itself, of course.

Laser Hot Hits has changed the 41m-band frequency from 7.455 to 7.460 kHz

Addresses:

Westcoast Radio: (WCR, Tulpstraat 10 a 2223HS Katwijk, the Netherlands)

Stauder Radio: PO Box 100621, D-45806, GELSENKIRCHEN, Germany or via Dortmund.

FRSH: P.O.Box 2702, NL-6049 ZG Herten in the Netherlands.

NEWS:

>from Sweden : Went out early this morning to our listening-QTH. Snowstorm and -7 degrees here.

Nothing heard from the test from Radio Fantastico. No further info available. The address, in case they are heard, are via SRS, Ytterby

Radio NOVA Int. tested all week long the new frequency of 9290 kHz.

TOWER Radio has been heard with 1000 Watts. The OP announced, that he wants to be active in the next weeks with 5000 Watts.

The Shortwave Relay Service (SWRS) will probably be back soon on the home channel 11470 kHz/25m. Listen out and check regularly for further information www.swrs.org. (Nothing new there at the moment.)

JRRI is presently broadcasting on 6235 kHz at weekends with 50W. In two weeks time the main Tx will be back in operation 160W and we intend to go back on 6240 kHz.

NEWS:

Tony Stevens of Radio Mi Amigo informs that he is currently doing some test transmissions in order to find a location for his 500 Watts transmitter. He is trying to expand his airtime and so he is looking for supporters who like to do some programming in the Dutch or German language on his station. Interested people can write to him at Box 53, Bilston, West Midlands WV14 6YS, UK.

According to the local newspapers one of the most fanatic employees of the RDR, the organisation responsible for hunting pirates, is now in the Doetinchem area, near Zeddum and Gaanderen. The article in the papers is showing this man in his car and his purpose is to close down all pirate activity in this region, more details via dr. Rör.

15069.98	Alfa Lima Int.	0731	Obviously the one heard with Dance music.

NEWS:

The Cx is pretty strange at the moment. From Spain reported ded bands after 08 UTC, same here at my QTH. Thought for a while that my antenna was broken, but strong stations coming in fine. Also amateurs on 80 m, but no pirates on 76 mb. Could have worked out fine this Saturday. Until next week/73's de Jonny

RJOY is back on IRRS on 24th of March, twice a day! So listen out.

Addresses to FRS-H:

FRSH, P.O.Box 2702, 6049 BE Herten in the Netherlands. Emails: frsh@go.to, peter.verbruggen@tip.nl or frsh@club.tip.nl

Offshore Echos Magazine has now officially open their home page at: www.offshoreechos.com

JRRI is now back on 6240 kHz with 180 watts. JRRI will relay Radio 510, Radio Cochiguaz, Radio Blandengue and more in the future. Those interested in swop relays, please contact JR_Radio@HotMail.com The JRRI web site has been kicked out by Tripod due to audio files, we will be relocating real soon.

R.Studio is a local FM station from St.Petersburg, but via pirate relay ??

Station Schotte gave P.O.Box 100621, 45806 Gelsenkirchen, Germany as address.

NEWS:

The droperator of 64 Brighton Rd have asked RADIO NOVA and RADIO XTC to find new maildrops....64 Brighton Road is no longer available as a mail drop.

Last week we had a strange relay of a Russian px on 6235 kHz, here is the answer: Radio Gardarika relays two FM-stations from St. Petersburg, R.Studio Nevskaya Volna (69.06 MHz) and Kanal Studio (102.4 MHz) and can be heard at nights with pop-px's on 6235 kHz. C/d at 2200v. Addresses: Radio Studio Doma, Radio "Gardarika", Livogsky prospekt 174, St.Petersburg, 197007 Russia. E-mail: studiosw@metroclub.ru Via Timofeyev in SWN, HCDX and NDL:3

For those interested in the UK offshore pop pirate's of the 1960's you may like the website below.
<http://www.sixtiescity.velnet.com/Guide.htm>

Radio Shamrock Int. is a special-event station for St. Patrick's Day run by Jolly Roger Radio. Reception reports should therefore be addressed to P.O. Box 39, Waterford, Ireland.

A new station is Radio Free Limburg. The station tested on Saturday with a relay of the legal FM station L1 Radio which normally can be heard on FM 95,3 in Maastricht 100,3 in Venlo. Radio Free Limburg operates with about 10 Watts feed into an Inverted-V antenna. The station can only be reaced by E-mail: pa92@hetnet.nl. L1 Radio has the address: Postbus 31, 6200 AA Maastricht, Netherlands. Their web-site is: www.l1.nl

EUROPIRATES heard in NORTH AMERICA:

Mr. Valko stayed beside his receiver until 0810 UTC on March 25th:

Really poor conditions this morning. No doubt a combination of poor propagation and the earlier sunrise. It was a lot more noisy than usual too. It was basically over by 0730 but I stayed to 0810.

9297.66	FRSH	0545-0600+	
6400.02	R Astoria	0602-0645	
6210 LSB	R Borderhunter	0612-0630	Testing in LSB.
9290	R Nova Int.	0639-0752	
6309.43	WABC (per Dr. Tim)	0648-0740,	Program of nonstop Pops and Dance
5799.84	Ozone/BBMS	0748-0806	Very weak

And Mr. Yoder did so, too, on March 25th:

RADIO BORDERHUNTER, 6210L 0645-0700 Strong and 100% copyable at first
 Unid, 6309.4 0645-0740+ Heard a song by Eric Clapton, a light pop ballad, & techno.
 RADIO SHADOWMAN, 6305 0650-0750 Presumed them because of FMing transmitter.
 RADIO NOVA INT'L, 9290 0655-0753 Probably the best signal overall
 RADIO ASTORIA, 6400 0710-0718 ID per Valko. Lots of talking, but very weak
 RADIO EUROPE, 7306U 0722-0729 Faint, on the noise floor.
 LASER HOT HITS, 6220 Noted in passing. The weakest signal I've heard from them

PIRATE SOUTH AMERICA:

March 24, 2001 (Saturday)

11440U Radio Perfekt (via Cochiguaz), 2214+, talks in English & addr in Gronau, western country music., ID's in English and German language. SIO:444

NEWS:

Re : 64 Brighton Rd - this one is only vlosed for XTC (now again Wuppertal) and Nova int (?), not for the other stations.

British based RADIO ANTARES, 9, The Hollies, GB-London N11 2EA, UK (phonebox 0044 771 937 1741) verified a reception report for a broadcast on February 11th on 3900 kHz. Oscar, the engineer told us some technical data: Transmitter power was 30 watts, and the antenna was an Inverted "L" longwire antenna with a network of earth rods, which is really intended for use on 1.6 MHz. This was fed via a 75 Ohm coaxial feeder and a pi-configuration antenna tuning unit. The station operates from an area just outside London and has no fixed times of broadcasting. It has been a test broadcast on a frequency which they had not previously used.

The programme format is a blend of speech and music, but (unusually for a free radio station) priority is given to the chat. They discuss a wide range of topics, but radio news and DX information is regularly included, which should be of interest to enthusiasts such as you readers. Their address is still valid!

Radio ISABELLA (Wuppertal drop) verified a report from October 1999 with a nice QSL card.

Radio COCHIGUAZ made it to Europe again with some country music relays! BTW, Radio PERFEKT was heard here in Germany.

Radio EASTSIDE announced that the todays show has been relayed by a friendly station.

Radio LAGUNA at 6245 khz and CWR at 7480 khz inviteted callers to phone (+49 173 41 61 543) or to send them SMS's.

Jurjen of Radio FOXFIRE says he has received much mail recently and is busy replying to the letters. The station is currently on the air with a Rhode & Schwarz which produces some 80 watts. Address: Postbus 128, 9410 AC Beilen, Netherlands.

LASER 208 will be back with another transmission next Saturday starting at 22.00 UTC on 76 metres. In April there should be one more broadcast before a break in service. This is because the house in which the transmitter can be found is completely rebuilt and the antenna on the roof has to be removed.
Address: Postfach 840124, 12531 Berlin, Germany.

TOWER Radio cut his Saturday broadcast short saying there pirate hunter Theo is in the neighborhood. Nevertheless, there will be a marathon broadcast with high power from Friday, April 20th, 20.00 CEST, to Sunday, April 22nd, 20.00 CEST on 48 metres. 3500 watts should guarantee good signals.
Address: Postbus 49, 7475 ZG Markelo, Netherlands.
The station's name refers to the 150 metre (legal) radio & TV tower in town.

2 of the top10 ptt-mans from the Netherlands always on <http://www.Free-Radio.de/rcd>

And finally, the unid on march 9th upon 6285 kHz 1900 - 1920 UTC was Aurora Radio with 40 W into an inverted V-dipole. Reports can be sent to Aurora Radio, P.O.Box 20, S-952 21 Kalix, Sweden or via auroraradio@hotmail.com

NEWS:

Not much this week. Have never seen so much of nothing in my mailbox!

What was the cause of the bad propagations this weekend? Well, the sun had a huge eruption during the week and blasting mother earth in time for pirate-weekend. Instead of nice music we got silence and a spoofy light above. No sign of the aurora here due to heavy clouds, but the lights have been observed in Germany, Belgium and UK.

Radio Geronimo, radiogeronimo@hotmail.com, is still looking for a rock DJ for occasional programs.

Time for a Easter-competition!

Yes, and it's getting even worser, instead of logging hundreds of pirates during the Easter, we gonna make it more fun. This is how it works:

From the initial letter in the station-name you have to form words associated with Easter!

Example: East German Golf Radio gives you the letters E,G,G and R.

With those letters the word EGG can be formed. As many words as possible.

If there should be too many with the same amount of words, some tricky questions to sort out a winner:

- In what year was the first SRSnews published?
- What issue-number did it have?
- Mention at least two e-mail-addresses used by SRS before the srs.pp.se.
- What's the temperature in Ytterby, Friday 13th at 07.00 UTC?

Logs and contributions should be at SRS-HQ on Monday 16th before 16.00 UTC.

One winner gets a Free Home Scandinavia CD or CD with FR-recordings.

And yes - we will be much quicker to present a winner this time!

If you can form the word SRSNEWS - 2 extra points!!

Logs from South-America

PIRATE EUROPE:

15069.73 Alfa Lima International, The Netherlands, 0510 - 0544, English, mx px (rock music), man announcer ID " This is Free Radio...Alfa Lima International, from the Netherlands" weak signal by readable (Eramo, Argentina)

NEWS:

Radio Bremen was raided while testing his new 1Kw S.W transmitter on 31-03-01 at 05:30 early in the morning local time. It was the first time he used the transmitter on air (no music was played just testing the carrier) after spending a lot of time to built the new equipment. He was heard announceing on F.M to quit the transmitting hobby.

Some non-pirate DX-Info:

This message is to inform that Radio Studio X is the first private radio station in Italy (and one of the fewest in Europe) broadcasting in AM STEREO with the MOTOROLA C-QUAM system ! You can tune into our frequency 1584 kHz 24 h a day and listen to our mix of news and the best music from the latest 30 years.
<http://www.radiostudiox.it>

We wish you a great Eastern! We will be back next Monday. 73is / SRSnews

NEWS:

Eastern - The free radio weekend of the weekends, but when going through the list, nothing different from a normal week. I was at my alternative QTH this weekend bringing radio and my new small active antenna with me.

Saturday night just an unid sounded like Seaside Radio when signing off.

Sunday morning started good with two reports, but at 8.30 UTC - all signals gone.

Monday morning - no sound of any free radio station, only those religious pirates screaming all over the bands.

Very good conditions on 76 mb, but no free radio to be heard!

My antenna seems to work when there is no QRM around - I have to shoot my neighbours! ;-)

Until next week, all the best and 73's / Jonny @ SRS

SUMMER MEETING 2001

Radio Borderhunter organize for the second time a free radio meeting.

The meeting place is on the Dutch/Belgium border on a secret place in the woods.

Free radio stations and listeners are welcome.

There are hanging some antennas for listening and transmitting! Music, drinks, stations and listeners together on the border by Radio Borderhunter on July 7th 2001. Start at 15.00 h. Till late at night. Around 19.00 h, there is a barbecue.

HOW MUCH IS THIS ?

You need a ticket of admission. 5 Dutch guilders.

For the barbecue lovers, much meat, dressing and sauce - 20 Dutch guilders.

sleep at night in a hotel with breakfast, 65 Dutch guilders.

Borderhunter will organize a pirate camping if there are interest people. Don't forget your sleeping-bag! Price, 10 Dutch guilders but no breakfast only coffee or tea. For organize a hotel room or the barbecue it's good you'll have to tell me beforehand. For more information you can e-mail the Borderhunter:

borderhunter@hotmail.com or write to:

P.O.Box 44, B-2387 Baarle-Hertog, Belgium.

'73 // Frans, operator Borderhunter.

PS you can only pay in Dutch guilders or Belgium franc

Correction:

Radio Bluestar was on 9292 kHz, not 6292 as noted last week.

NEWS:

Huge Aurora this Sunday afternoon. Covered all way down to Spain!!

The operator of NMR tells SRSnews that he still exist and are planning for new broadcasts in the near future. The operator also ask for mx requests.

NEWS:

A really nice log this week, eh? Tomorrow Tuesday could also be some activity on the bands, so listen out! 73s / Jonny

Some information from Radio Pirana, South America:

We are working with our transmitter to put it in working order for this coming weekend. Hopefully we will have it in transmitting condition, but we can't promise it 100% since there are a lot of other circumstances that can impede having it ready. We have the intention to use one of these frequencies probably at Thursday very late; we will have a definitive one. Frequencies are: 6925, 11415, 15012 or 15040 kHz. Can any one in the Australia zone tell me the conditions stations from S.Am for these bands to your area? As I have understand by another DX colleges, on 6.9 and 11.4 MHz is best between 08 and 11 UTC. This is probably the same for 15 MHz. Anyway we intend to be on air until 11 UTC, starting at around 21:30 UTC on Friday 4th until around 11 UTC on Saturday 5th.

Home page: http://www.geocities.com/radio_piranha

Radio East Coast Holland will change the freq in the coming summer month's and will be active in the 41m.band on 7480 kHz or 7475 kHz depending on what is free. Normaly we will only use the 100 watt T.X. Maybe there will also be some tests again in the 26m.band on 11485 kHz for the Saturday night time. <http://eastcoastholland.net> or www.geocities.com/eastcoastholland for more info.

Did you think Pirate Reflections was dropped ded? I'm sorry to tell, we still alive and thinking about putting a new issue together. Therefor we need some good material from readers, listeners and operators. Send to: pr@srs.pp.se

NEWS:

Fair to good signals this weekend. I was ready to listen and did hear a few stations before my neighbours started their washing-machines. From good reception to nil in just one second. I've been told it's illegal to kill neighbours so I will try something else. Seems like Speranza is back again. Only included in this issue, next time removed.

See you next week / Jonny @ SRS

Radio Geronimo tells us that listeners could try some evenings on 6880khz or 6933/6945khz/7545/7562khz between 1900hrs and 2100hrs and also some Sunday mornings on 9315/9330khz or maybe even 7525/7562khz. They have given 4805khz 60mtrs a rest for the time beeing, but will return there later. The station is still looking for a DJ.

Just to let everone know, Eurosonor R are legal. They are a music shop from south west germany.

Due to the fact that BBMS hasn't received any snail mail at all over the last five months and very few e-mails, it has been decided to close BBMS down. This means that the Bobby Sparks show will continue as the Radio Ozone International German Service possibly lasting one hour every three or so weeks. Also having lost such presenters as John Knight and Robbie Duke due to lack of response in their direction Gary Stevens has found very time consuming and unrewarding to continue as one-man presenter. So the last broadcast, if I can find any enthusiasm for making it, will be on Sunday 24th June 2001, possibly on the frequency of 7.410 starting at 08.30 UTC (09.30 BST). We may occasionally do a few one-off programmes on holidays but apart from that its pack up your bags and go time. Radio Ozone needless to say doesn't mind talking to himself and getting no feedback and will obviously continue, why we do not know. Should a lot of you out there reading this be crying in your tea or coffee and would like to make yourself known please e-mail us back saying why we should stay, not that I expect many of you will even do that. As always our e-mail address is: bbms4ozone@compuserve.com - Goodbye.

Regards // Gary Stevens // BBMS soon to be gone

 14566L Radio Blandengue, 0153, postal address in Chile heard, and music. At 0159 music of Perez Prado. SIO: 443 / 242

NEWS:

Not much to report this week. The Radio Free London program reported on 5805 kHz is probably not RFL. Got a letter from UK telling me that it's something else about Radio London. Starshine Radio are back again after long time off the air. Only for short tests, says the op. The old transmitter does not work anymore and a new one is under testing. Frequencies will be around 6270-6310 kHz early Saturdays and Sundays (i.e.05.00-06.30 UTC).

Nice activity during Saturday! I can also report that the 50 MHz opened for the first time here at my QTH this weekend, that means that stations operating on very high frequencies, i.e. 15 MHz and above, will now have better DX-operations.

NEWS:

Station Schotte ("The Scotsman") was on the air June 2nd with a special show.

The 60 minute programme was dedicated to the "peace pirate" who is a guitar player/singer and a friend of the station operator. If you send a report to Postfach 100621, 45806 Gelsenkirchen, Germany, please add a message to the "peace pirate" as he is seriously ill and in hospital at the moment.

Radio Spaceman had visitors from Germany again this weekend, Chris Ise of Crazy Wave Radio and Jens Martin of Radio Benelux. By the way, Chris mixed up Holland and Italy when announcing the Spaceman's hotline.

Further to your news report, WMR 7446 right now, actually 7445.7, is not the real WMR, but a replay of Sundays programme. This imposter obviously had good reception of the real WMR to reproduce this on the similar channel to the real WMRs 7446.2, in less than two days after the real show closed. Noted in Scotland and England 1820UTC with good signals.

//Jack

The Voice of the Netherlands webpage can be found at http://www.geocities.com/voice_of_the_netherlands/

Neue deutsche Polkawelle was heard for the first time on June 3rd. Despite the name, the station played only German Schlager from the 70s. The programme logged consisted of nonstop music with only one ID. The voice sounded pretty much like the one of Roy Clark (Star Club Radio).

Radio Free London is back every weekend on shortwave 5805 kHz only. Further info can be found at their website www.radiofreelondon.co.uk.

On July 7th organize Radio Borderhunter a Free Radio Summer Meeting on the Dutch/Belgium border.

ALL!!!! Stations and Listners are welcome.Come and meet your Free Radio friends!

The meetingplace is in Baarle-Nassau.You find Baarle-Nassau on a map exactly 15 kilometre South between the Dutch city's Breda and Tilburg. On the motorway between Breda and Tilburg you take exit Gilze,Baarle-Nassau.From there you can follow the billboards to Baarle-Nassau.

In Baarle-Nassau you must follow the billboards F.R.(free radio) If you can't find the billboards or lost your way,please call the mobilenummer (0)6-10531057.Tell where you are and we help you. There are hanging antenna's for listning or transmitting. Around 17.00 UTC we have a barbeque.

If you want to sleep in a hotel with breakfast (65 Dutch Guldens) it's good to tell me beforehand.You can also sleep in the Piratecamping.(10 Dutch Guldens)

There is a roof above you head and you have a real bed. Don't forget your sleepingbag! We start at 13.00 UTC,15.00 local time,till late at night. Music,drinks,listners and stations together on the Dutch/Belgium border on July 7th.

Please to meet you! For more information; borderhunter@hotmail.com

Un-Pirate info:

SWR! have got a license to use three new frequencies on a new 49 mb-area. These frequencies are 6170, 5980 and 5990 kHz. Our technicians have worked very intensively with new equipment we need for 49 mb: new transmitters (both 25 and 48 mb!), new antennas etc. If everything goes right, we take this new band on use in July. We might also have some test transmissions, so please follow messages in our web pages.

This new band will serve listeners in the near areas (where 25 mb can't be heard regularly). We are expecting to reach a good audibility in Finland, Sweden, Norway, nearest areas of Russia and Baltic-countries (Estonia, Latvia and Lithuania). These broadcasts can be heard well occasionally in some other North-European countries, too (Poland, Belo-Russia, Germany, Denmark etc.).

On 25 mb we will continue our service normally on 11690/11720 kHz.

SWR's application for permanent broadcasting license was returned. The reason was: "Because government has not made shortwave frequencies available for applicants, license can not be granted."

SWR's is currently operating on short term licenses. We do have a valid broadcasting license for the end of year 2001.

NEWS:

RADIO TITANIC (HOLLAND) announced a new address: Tulpstraat 10A, 2223 HS Katwijk aan Zee, Netherlands.
The Dortmund maildrop is no longer valid.

Information concerning the pirate activities in the 11.4 MHz. - 14.0 MHz area

11420,2 khz AM Radio Piraña International.

11424,0 khz AM & LSB Radio Bosques from Argentina.

11440,0 khz USB Radio Cochiguaz

14570,0 khz LSB Radio Blandengue.

An unid station has been heard on 3910 on late Saturday. Lots of announcements in English, but not not easy to understand. Most times it sounded like 'this is Free Radio - Radio Folks'. Perhaps Radio Focus, since they played at least one song in a Scandinavian language and one song by ABBA ? No address announcement or presenter name heard.

LOG FROM SOUTH AMERICA.

June 16th, 2001 (Saturday)

15070 Radio Alfa Lima 22:00-23.12 music, 35333

NEWS:

R.Bosques, 11424 kHz AM/LSB, have this new e-mail: radio_bosques@yahoo.com.ar

The old tamana@emocion.com.ar have not been working correctly. Please, re-send again your messages to Bosques.

Only snail mail reports will be confirmed with QSL card. Their address is:

Mr.Alejandro Garcia, Magdalena nr. 34, 1874-Villa Dominico (B.A.), Argentina

All reports received up to the past weekd, have been confirmed with QSL on this weekend, the sames, will be sent tomorrow by snail mail.

FFFR, // Mr. Ant // Radio Marabunta

Seems like Dortmund-drop is back again. Have seen notes that letters have been sent out.

KHZ = Kelvin-Henry-Zulu = Unknown unit

KhZ = Kelvin-hour-Zulu = Unknown unit

khz = kilo-hour-"third unknown unit in math" = Unknown unit

kHz = kilo-Hertz = Well known unit.

Kelvin = Temperature-scale

Henry = i.e. value for coils

Zulu = Time, like UTC

z = like $6=x*y+z$

No further comments, but you know what I mean, hi.

Have seen a special-QSL, with 96.3 MhZ - **Mega-hour-Zulu** = Great time??

LOGs FROM SOUTH AMERICA.

June 22nd, 2001 (Friday) :

15.070,00 AM, Radio Alfa Lima, 23:15, june 22, music, 35333

NEWS:

>from Germany : uk very good in time slot 18-20 Utc on saturday. Sunday great signals but lots of splatters from utility on the band which made it not easy to identify. Later sometimes noisy and fade outs.

>from Spain : very poor signals as usual sorry for me, but .. around 40° and increasing, no traces of propagation.

News of a new station which plans to begin testing next weekend on 7540 (41m band) FOCUS 7540. We would welcome reception reports either by email or to a phone number, both of which will be given on the air. Let's hope conditions are better than this past weekend!!

GROLSCHMAN RADIO announced the following address: Postbus 44, 2387 Baarle-Hertog, Belgium. The E-mail-address is as follows: ruk48@hotmail.com. Their hotline is: 0044/794/6169610.

A new station is JUNGLE RADIO. The station can be reached under c/o Schotte, Postfach 100621, 45806 Gelsenkirchen, Germany as well as via FRI in Dortmund.

A few days ago RADIO LIBELLA from Southern Germany began testing from a mobile site. At the moment they do not have a P.O. Box, but they ask for reception reports to radiolibella@hotmail.com

Announcement for a meeting : 2001 - an on-air odyssee ? This is the headline for a meeting of radio friends, taking place on september 15th 2001 in Düsseldorf, Germany The event is planned as an open meeting place, where all interested people are invited to. The CAROLINE SUPPORT GROUP is inviting their members to meet there. Also the RADIO NEWS and the RADIO JOURNAL will be present. The company CHARLY HARDT will make a demonstration of WORLD - SPACE receivers and inform about the system. Invited are also former listeners / club-members and employees of BNL Radio. Starting of the event is 12.00 hours, opening at 11.00 hours, open ending.

The event will take place at the "Restaurant Bootshaus Nautic". This houseboat is moored at the northern entrance of the Sporthafen in Düsseldorf. This harbour is at the right bank of the river Rhine, north of the Düsseldorf old - town, car entrance "Robert Lehr Ufer " possible at the Restaurant "Rheinterasse".

The a-la-carte restaurant is open at moderate pricing. From Düsseldorf railway station one can get there with subway U78 or U79 till "Klever Straße", then its only a few minutes walk in western direction to the Rhine.

The entrance fee is 10 DM (free for caroline Support group members). Preliminary registration or requests please to : Jan Sundermann, Millrather Weg 74, D 40699 Erkrath, eMail rp10510@online-club.de.

Semana 28 y 29: SRSnews toma vacaciones!
Semana 28 e 29: SRSnews faz exame de férias!
Vecka 28 och 29: SRSnews tar semester!

JRRI informs:

Other FR operators please note that JRRI will be on 6239 kHz every Saturday and Sunday and occasionally during the week, with 185 watts. Please do not transmit on this freq. We will relay any FR station. JRRI is now also on 107 FM in SE Ireland.

We have also got information from Holland that Swinging Radio England IS Free Radio England with old jingels from Radio England.

Finally a warning.

At the moment there are a lot of computer-viruses on the net. The most common one are a message, from someone you know, with a file attached. Check the text carefully, in most cases it makes no sence to the reader.

The virus infect your computer, read your e-mail-phonebooks (Netscape and Outlook) and send a copy of itself to all in the list. Not all at once.

Around 10-15 minutes after you signed on to the Net, the virus send out the mail with copies of it. Not via your e-mail client, as the virus is a client itself. McAfee or equal will remove and protect you good.

NEWS:

Summer-edition? Nah, more a late issue. **I'm having vacation!** <grin>

For those reading Argus News, don't worry. If they can not fill that publication with stuff that makes sence, I'm happy to be there for them. My thoughts about that staff remains unhurted. <grin>

I hope you have better summer than I have, rains all day and nice weather by evening.

See you next week, I hope // Jonny

From Tower Radio (radiotower@netmail.nl), we got this info:

This is Robbie from Towerradio, monday whe got a ticket from dutch ptt. We got a warning when we going broadcasting than we must pay fl.5000 nlg. More news soon on ower web site. I send a copy to Martin from kiel and he make this on ower webpage. But Sunday may be the last on 6306 khz whe make ower program on 04.00 hours netherlands time. Hope you listening to towerradio.

And p.t.t. thanks for this ticket.

ROBBIE TOWERRADIO. (<http://listen.to/towerradio>)

For some info about the Baarle-meeting, visit:

http://www.geocities.com/alfa_lima_international/

(Editor's remark: If you have not visited this page - do it!)

Radio Geronnimo will be changing mail drops, ALL new broadcasts will have a new contact address. The Leicester address will no longer be used. More info when we get it.

From the magic Wizzard, we got this note:

Just a quick message to let you know that my new Free Radio website is now on line. To read news and features about international free radio, go to www.magicspell.free-online.co.uk. There are also recordings of stations so that station operators can check to see how their signals have been heard here in England. Have a look and dont forget to sign the guestbook!

----- end of SRSnews -----

Have a nice summer!

Logs from the U.S. of A.

15070 Alfa Lima Int., 2220-2236, "Seasons in the Sun", "Baby Makes Her Blue Jeans Talk", talk by AI about stations expecting to broadcast, greetings, song announcements, IDs. Fair and clear. (Valko 14 July)

15794.87L R. Borderhunter, 2254-2309*, "One of These Nights" by the Eagles, instru. music with voice-over saying it was getting late and was coming up to the end of the program. Mentioned being on at 0600, acknowledged reports from NB, TN, and NY. Talk about the computer. "Man of Action" theme song and B-H Belgium addr. Off with "We Love the Pirate Stations" which didn't sound like Trinity. Very nice, strong, clear signal. (Valko 14 July)

6306.28 Tower R., 0205-0212, Music with man voice-over giving IDs, and phone many times. Fair but some SSB QRM. (Valko 15 July)

11484.76 R. Bandonica/R. Enterprise, 0723-0739, Pop and Dutch music. Recognized "The Rose" at 0733-0737. Man with mention of Bandonica, reception report request, phone, and addr at 0729. That was the only announcement I heard. I believe the station went off sometime between 0741-0744 while I was switching power supplies. Kind of weak with intermittent QRM. Sometimes easily readable however. (Valko 15 July)

7486.75 UNID. (Ozone??), 0801-0820, Pop and Rock music none I was able to recognize. Many announcements by man in altered echo voice over music. Kind of sounded like German. Gradually faded out. Fairly weak with slight 7490 slop QRM. Maybe Ozone relaying a German station?? (Valko 15 July)

NEWS:

Seems like I am not alone taking some time off. Next week, are we back as normal again for three to four weeks. Then I have my second lazy season. Thanks for the contributions and stay cool // 73is de Jonny

Studio Northlight now live via Internet

Now you can also listen to Studio Northlight via Internet. Visit the home-page at <http://listen.to/Northlight>, click the LiveRadio-button and follow the instructions. All what you need is the Winamp-player.

If the banner-link is no working, open Winamp, choose Open - Location and type in <http://166.90.148.112:16168>

NEWS:

Radio Geronimo has changed their address to c/o SRS, Ytterby.

RADIO BLUE STAR now has an MP3 stream on live365.com. Follow the link on the website which can be found at run.to/bluestar or www.free-radio.de/bluestar.

RADIO JOYSTICK had bad luck with its latest IRRS relay. The modulation vanished one minute after the show started. IRRS was on the air all weekend with its carrier only ...

Dr. Geil put out his LOVE PARADE RADIO 2001 show on 6286.8 kHz July 22nd. This might have been the final broadcast in case the Berlin Love Parade won't take place again next year. Special QSLs are available from Postfach 520112, 44207 Dortmund, Germany.

The "Yesterday" oldie show heard July 21st on 3926 kHz was a syndicated programme produced for commercial stations in Bavaria and Italy. The host Markus Thews used to be on pirate radio years ago as he states on his website www.markusthews.de. No P.O. Box was announced, but the station can be contacted by E-mail: radioyesterday@gmx.net

Updating SRS news 29, TOWER RADIO has been ordered to pay 5,000 Guilders by the Dutch radio regulation authorities in mid-July. Whether a raid actually took place is not sure yet. July 14th, the station was back on the air with a test from what was claimed to be a new location. Next day there was another transmission with the operator of STATION SCHOTTE from Germany taking over some of the airtime. Frequency used was 6306 kHz.

Radio Free London whom many will know broadcasts on 5805 kHz has from this weekend [21st July 2001] moved to 5800 kHz due to interference from a utility traffic on 5807 kHz. Dave Small has been asking for reception reports on the new channel which need to be e-mailed to 5805@radiofreelondon.co.uk

Gary Stevans from BBMS has been going through his crystal collection and found that he had the following surplus to his needs. This list is as follows:

3 MHz Crystals (these are all £3.50 or \$5 each including postage)

Type FT243	3.885: 3.920: 3.925: 3.938: 3.945.20
Type Hc6u	3.903.34
Type 10x	3.941.35

5 MHz Crystals (these are all £4.50 or \$6.50 each including postage)

Type FT243	5.700 (3): 5.765: 5.775: 5.780: 5.806: 5.820: 5.828: 5.870: 5.900: 5.925 5.965
Type Hc6u	5.617:
Type 10xAJ	5.720 (2): 5.848: 5.930
Type 10x	5.810 (3): 5.855

6 MHz Crystals (these are £5.50 or \$7.50 each including postage)

Type FT243	6.231.75: 6.240: 6.250: 6.260.90: 6.313: 6.315:6.400: 6.815: 6.873.333
Type Hc6u	6.300: 6.648
Type 10xAJ	6.240
Type 10x	6.438
Type 10x	6.438

7 MHz crystals (these are £5.50 or \$7.50 each including postage)

Type FT243	7.447: 7.450v: 7.460 (2): 7.474.50: 7.500: 7.525: 7.555
Type 10x	7.444.80: 7.450v

(7.290.21 Type 10x free with any order useful for Tx testing also 7.600 with harmonics of 15.200 or 22.800 and 7.867 both Type FT243)

9 MHz crystals (these are priced individually including postage)

Type Hc6u	9.162 (£6.50 or \$8.50) 9.370 (£6.50 or \$8.50) 9.344.50 (£6.50 or \$8.50) 9.410 (£3.50 or \$5.00) 9.950 (£5.50 or \$7.50)
-----------	--

Code Types:	FT243	=	small ebonite (three screws)
	Hc6u	=	small metal
	10xAJ	=	cream/metal
	10x	=	large black ebonite

There are also a large number of crystals ranging from 5.200 to 5.600 all these are Type 10xAJ and are totally free to anybody that wants them they are metal bodied and sealed but could be opened up ground higher and put into spare crystal cases, send e-mail for list to bbms4ozone@compuserve.com . Each and every crystal listed could be moved higher in frequency. // **Gary Stevans // BBMS (retired)**

NEWS:

From Germany : quite good conditions on all bands. Nice programmes. CU next week in Merchweiler.

From Sweden : Poor conditions today, Sunday, aswell as the rest of the weekend. Thought I forgot to connect the antenna!

A reader came up with a well motivated question; Why does not e-mails to the FR-stations work? Have posted several e-mails but most of them bounce back. Does any of the other readers / op's have any answers?

ZENDER FREQUENTIEMAN is a new name for an old station: The Voice of the Netherlands. Correspondence can be sent to Postbus 663, 7900 AR Hoozevee, Netherlands.

New on the 48 metre band is Radio VERONIQUE. The station announced to be broadcasting from Markelo and seems to be connected with Tower R. Only a hotline was announced.

New adr. for R NOVA (UK) : RNI c/o Box 130 92504 Rueil Cedex, France.

DX Camp Gronau am 01/02 Sept. 2001 (The following info in German)

Hallo Free Radio Freunde, noch fünf Wochen dann ist es wieder soweit, Free Radio Camp in Gronau die siebte Auflage läßt grüßen! Hier nun die Anfahrsbeschreibung zum Free Radio Camp in Gronau am 01/02 Sept.2001.

Aus Richtung Ruhrgebiet kommend auf der A 31 die Abfahrt Gronau/Enschede abfahren.

Vom Autobahnzubringer weiter Richtung Gronau fahren nach der zweiten Ampel rechts in den Heerweg abbiegen, diese Straße bis zum Ende durchfahren ca. zwei Kilometer, dann wieder rechts auf die Gildehauser Str. nach ca. ein Kilometer nochmals rechts ab auf den Hagelsweg. (Richtung Dreiländersee).

Jetzt noch ungefähr einen Kilometer geradeaus dann links die Einfahrt "zum Bootsteg" und Ihr seid da! (Auf Beschilderung "RCNW" achten)

Aus Richtung Norden kommend von der A 30 die Abfahrt Gildehaus benutzen. Von dort aus weiter Richtung Gronau fahren, nach ca. zehn Kilometer links in den Hagelsweg (Richtung Dreiländersee) abfahren, befindet sich hinter dem Gasthof Driland! Jetzt noch ungefähr einen Kilometer geradeaus dann links die Einfahrt "zum Bootsteg" und Ihr seid da! (Auf Beschilderung "RCNW" achten))

Aus Richtung Niederlande kommend die B 54 folgen Richtung Gronau am Kreisverkehr weiter Richtung Ochtrup fahren, nach der zweiten Ampel links Richtung Gildehaus/Bentheim abfahren, von dort aus ca drei Kilometer geradeaus aus Gronau raus bis zur Abfahrt Hagelsweg rechts ab (Richtung Dreiländersee)

Jetzt noch ungefähr einen Kilometer geradeaus dann links die Einfahrt "zum Bootsteg" und Ihr seid da! (Auf Beschilderung "RCNW" achten) Falls alle Stricke reißen einfach nach dem Drilandsee fragen, kennt in Gronau jeder ;-))

Wer eine Zimmerreservierung benötigt sollte mich direkt anrufen oder mailen in der nähe befindet sich eine günstige Pension ca.500 Meter entfernt. Einzelzimmer 35,-DM Doppelzimmer 65,-DM (mit Frühstück)!!! Es stehen aber nur zwei Einzel und drei Doppelzimmer zu Verfügung!!! Also wer zuerst kommt... Soweit alles klar?! Wenn nicht, bitte Mail an Driland@gmx.de oder anrufen Tel.: 0179/4555236 oder 02562/729214 Wünsche allen Teilnehmern eine gute Fahrt nach Gronau, Gruß Klaus! P.S: Beginn des Camps ist am Samstag 12:00 Uhr.

Nice reception in the US of A again. some logs here presented by Valko and Hodgson.

August 4th, 2001 (Saturday)

15069.90 Alfa Lima Int., 2325-2345, Rock mx by The Kinks, etc. Alfred w/IDs, snail and e-mail addrs, phone number, talk about modulation, acknowledged e-mails, gave weekend pirate info often. Very nice signal (averaged around S-7, sometimes up to S-10!!!), but mx modulation low. (Valko 4 August)

15806.69 R. Black Arrow, On at *2351:45. Dance and Pop mx. Finally ID and tlk over mx at 0000, into Spin Doctors song at 0001. Another quick ID at 0004, remake of "Hit the Road Jack", also "Running with the Devil" by Van Halen. 0014 ID and ment of listeners in N.A. and 70 watts. Weak. Freq stabilized on 15806.72. (Valko 4-5 August)

August 5th, 2001 (Sunday)

11484.78 R. Bandonica, 0418-0445, "In America", "Ob-La-Di, Ob-La-Da", "Young Girl", and others. IDs over mx after about every 4 songs or so. Quite weak w/QSB and lcl QRM. Still in past 0520. Might've been a little better at the DXpedition QTH. (Valko 5 August)

Hodgson had tent Enterprise. SINPO 24232

15069.9, R Alfa Lima Int., 0409-0630 UT 5 Aug, Great signal, SINPO: 43444, excellent modulation. PX was not live, but recording played, while operator was asleep. Numerous IDs and addresses given. There was some splatter type QRM from Iran on 19084 prior to 0500. After that, in the clear.

15794.96L R. Borderhunter, 0425-0650, ID and greeting at 0451, "One Day Ticket", and "Gonna Get Along Without You Now", 0457 greeting again, "Video Killed the Radio Star", 0508 ID, song annmnt, report requests, e-mail addr, acknowledged more listeners. Very strong. Seemed to drift slightly down to 15794.92 by 0530. (Valko 5 August) Excellent signal, SINPO: 45544. (Hodgson)

15806.6, R Black Arrow, 0002 UT 5 Aug, Fair copy at peak. ID around 0004, as follows: "Very good morning. This is Black Arrow, from the Netherlands" The song "Hit the Road Jack" was played @ 0005. SINPO: 32233. Signal was weak by 0100. Very good audio quality and strong modulation.

NEWS:

Already August! Only four months left to Christmas-season!!

Next week I'll be having vacation again (if I work?). This mean that the SRSnews can be sent out a bit late depending on what I'm doing. But I have no plans to stop the editing, so keep sending your logs.

For the records, Bermuda was not on 7480 kHz last Sunday. That was planned, but there was another station on the frequency. So they decided to go to the 6260 kHz, the prepared and taped program for the 41m-band was played there. Via DJ Dipol.

Although under construction, you can find our webpage under www.seasideview.org then the NOVA option.

BRITAIN RADIO INTERNATIONAL plans to return to short wave with initially a 4th Sunday of the month schedule but this may increase to 2nd Sunday too. Letters and reception reports to Britain Radio International Test Transmission , Post Office Box 39 , Waterford , Ireland.

SWINGING RADIO ENGLAND main man Mr Tony Randell has stated that the transmitter blew up last week and now using a reserve rig with much better reception. Please note this station has one hour of 1950s comedy each week which is mainly the Tony Hancock half hour shows which are very funny.

RADIO FREE LONDON Dave Small is asking for listeners requests for the offshore and landbased feature over the next two weeks. E-Mail him at 5805@RADIOFREELONDON.CO.UK with what you would like to hear on the special

The SWLCS meeting in Merchweiler 2001 :

It was a nice meeting from Aug 3 to Aug 5 in Merweiler. These were the guest from the pirate scene : Star Club Radio, Radio Perfekt, Radio Dr. Tim, Eastside Radio, Station Schotte, Radio Illusion, Südwestradio, R Waves Int, Radio Sockenschuss, Radio Wonderful, Stardust Radio, CWR, Radio Benelux, Radio Likedeeler, Radio Bermudadreieck, Radio Bobby, SRS Germany, SRS France, SRS Germany, Axel Röse, Josef Zimmermann, Ulrich Preisler, Kurt-J. Przystupa, Stefan Dietl, Steffen Werner, Rainer Schneider. You'll find a more complete list of paticipating stations and listeners soon in Dr. Tims camp report. Several pictures that were taken will be available, too.

Due to bad weather and important family matters a lot of people didn't show up. Nobody from the Netherlands, Italy or Scandinavia. But Peter Hills of RWI was there for instance. And the unavoidable fm-der christian bruellhard from switzerland. Most guys at the camp, did what they always do there : talking, transmitting and (t)rinking. Thanks to local qrm from utility and sat dxer's it was not possible to hear a lot. Best reception occured at the camping site on the other side of the camp. Another bad thing was, that all restaurants were closed on saturday at lunch time. But the xyl's at the camp served all the hard working dxers with sausages, stakes, cake and coke (and even with a few bottles of beer).

Some news : Radio Eastside did several interviews with stations, listeners and 'officials'. He'll air the tape via SW of course. And Radio Eastside will do some more relays in August.

Radio Sockenschuss ended in late 2000, the OP has new plans but he's not yet ready. Station Schotte has big plans for the future, too. The new station Radio Diva (perhaps featuring Diva International, the one who won the Grand Prix some time ago) is scheduled for autumn. And Radio Benelux uses the SRS Germany drop box beginning in September.

There are thoughts of doing Free Radio Camps next year in Langenselbold (Radio Perfekt) and East Germany (Radio Eastside). Any suggestions are welcome.

Two other highlights : a meeting of the listeners club of Radio Slovakia Int with a host of the station and the visit (and musical performance !) of Dorothea and Rüdiger Klaue of the German section of HCJB. These two are coming to Germany after 19 years in Quito. Thus also explains the Andino music played by Dr. Tim on Sunday evening. Expect more music to come from this region.

Once again, thank you Peter and Ilse Hell for organizing this camp !

Some catches again over-seas:

5800.2, Radio Free London, 0315-0406 Aug 4, numerous IDs, noted Carol King "Too Late Baby" and Credence Clearwater Revival's "Bad Moon Rising" among the musical selections. Poor with some fair peaks. (D'Angelo-PA)

6276.3, Swinging Radio England (presumed) 0430 UT 12 Aug, EE px, mx then British Comedy sketch that lasted over 20 minutes. Fair to weak, but started to fade out shortly after 0500. No ID, but a number of European Dxers responded to my UNID log in the SW pirates group, and all of them suggested this station.(Hodgson, TN USA)

15070, Alfa Lima International, 0210-0405+ Jul 29, continuous rock music with periodic announcement breaks by Alfred with IDs and encouraging listeners to sign guest book at website (www.alfalima.net). Strong, steady signal.(D'Angelo-PA)

RADIO BLACK ARROW, 15807.4, 0353-0505* FADE, 8/11. Sign on with instrumental mx, oldies pop music with ID by OM. Weak in local noise. Gone by 0410. SIO: 121 [Lobdell-MA] / (Hodgson TN USA)

15795 LSB, R Borderhunter (test trans), 2230-2310 UT 10 Aug, R Borderhunter conducted an extremely low power DX test on 10 Aug. Frans dropped the power in increments over a 40 minute period.

25 watts @ 2230 Fair/good copy.

10 watts @ 2240 Fair copy.

1 watt @ 2245. weak/fair copy. No problem understanding every word.

500 milliwatt- 1 watt from 2245-2302. Weak but still I could copy every word.

0-100 milliwatts Very weak, but still in there. (Hodgson TN. USA)

NEWS:

Radio One-O-one, any info?

New Station is Born. The station name is Classic Rock Radio. They will soon be active on 41 mb (maybe 7420 kHz) AM. You can already guess what their program is build up with, Classic Rock.

Their webpage : <http://www.geocities.com/classicrockradio/>

Their email adress: classicrockradio@hotmail.com

They will use the 663 Hoogeveen Maildrop; Classic Rock Radio, PO.Box 663, 7900 AR Hoogeveen, The Netherlands

An old SW Europirate, WNKR (= West & North Kent R.), from 1994 and earlier, is now back and testing on 6285. Present today and yesterday, probably not at hours that were good for NA reception. But the operator says that he will be trying a marathon broadcast starting on Saturday 25 August in the morning (around 0900, possibly, but maybe earlier) and continuing through the late afternoon UTC on Monday 27 August, which is an English public holiday. Power is 40 watts.

Info from R.Nova on 76mb:

Just to let you that from now you can find us at www.seasideview.org then press the NOVA button... although still under construction already some interesting info about us! Addr: Radio Nova 76 mtr, P.O. Box 128, NL-9410 AC Beilen, Holland

NEWS:

There is now an audio file of R Borderhunter's micro power test available at the SW pirates yahooogroup:
<http://groups.yahoo.com/group/SWpirates/files/>

RADIO ILLUSION made an unexpected return to the shortwaves this weekend. The station now can be reached via Postfach 10 06 21, 45806 Gelsenkirchen. The Dortmund maildrop has also been announced.

CUPIDO RADIO made one of its rare broadcasts. This time they were on 6400 kHz. A new hotline was annouced.

For all those people who want to listen to JOLLY ROGER RADIO and its relay programmes on 6238,6 and 6395 kHz with strong signals on the continent: Please try it at the start of the transmissions Sunday mornings around 00.00 UTC!

Laser HH on new frequencis. Better reception reported in Sweden.

Addvertise:

We have a special offer for you: a 35 watt FM-mono transmitter with a lot more:

2 antennas and switch

1 power supply for the transmitter

1 mixer with 4 mics , 3 combined with headphone

1 gigaLink with a distance of 150m

and a lot of cabel...for only 1200,- DM.

You only need music and then you have your own FM-station!

Euro-pirate log

Netherlands 11484.9 AM R Enterprise/Bandonica 0358-0530 26 Aug. Oldies with some modulation problems in the begining. "It's my party" @ 0357, "Young Girl @ 0418, "Runaway" @ 0425. At 0440, the format switched to Top 40 pop. Super deep bass, excellent audio quality. Signal peaked at fair to good level around 0515. R Enterprise IDs and e-mail address given @ 0515 and 0525.(Hodgson, TN USA)
[David has been mentioned several times in the px by AL International]

NEWS:

> from Germany : Lots of stations, all week long, but bad conditions on late sunday morning. Those who got out of bed quite early heard more ...

Tight on 6238.6. Two stations at 0755, probably JRR and Likedeeler?. JRR was the strongest (in Scandinavia).

"Shortwave Delights" is a weekly programme which deals with AM, FM, Internet and of course pirate stations.

Classic Rock R played a lot of classic rock on 7470, but no IDs.

EVEN RELIGIOUS NOT SAFE - The ODTR have visited the site of a Donegal shortwave religious pirate - which usually broadcasts on Sunday evenings - and has asked them to switch off. - acc. to Irish Radiowaves. Must be Reflexions Europe (3210, 6295 and 12255 kHz) I suppose ??? (SHN in HCDX)

Log's from the other side of the pond:

September 1st 2001

15069.95 Alfa Lima Int., *2207-2300, OC on at 2207, sudden music start up at 2209. Finally opening ID announcements at 2227. Later gave usual ID/addr/ phone number announcements as well as pirate skeds. Not a very strong signal but still 100% copy. (Valko 1 Sept.)

September 2nd, 2001

6220.05, Laser Hot Hits (p), 0353, In there but quite weak. British anncr doing voice over, mx jingles etc.(Hodgson , TN. USA)

6238.59, JRRI (p), 0137-0700, Weak to fair strength. American musician talked about North Carolina.(Hodgson, TN. USA) (Valko 2 Sept.)

6240.45 R. Casanova, 0450-0528, Mainly German Pop-like mx (Valko/Hodgson,TN. USA)

6266.55 UK Radio, 0556-0559, ID by man over instru. dance music. Addr given, and continued dance music. Not very strong but IDable. About 85% copy. Drifting down slightly. (Valko 2 Sept.)

6276.4, Swinging Radio England, 0137-0633, W/OM in EE.(Hodgson, TN./ Valko USA)

6288.31 Was a station here at 0655?? Just a weak het, no audio.(Valko 2 Sept.)

6303.60 Alfa Lima Int. (pres.), 0636, Weak with just bits of audio. Also heard 15069.9 at 0705 but that had horrendous noise right on top.(Valko 2 Sept.)

6399.53 Possibly a station here at 0603. Definitely a het (Valko 2 Sept.)

6395 Laser Hot Hits, 0603-0606, Pop songs by David Bowie (Valko 2 Sept.)

7434.10 R. Ozone Int., 0643-0654, Live Rock concert, finally ID at 0650. Mention of rain, and Mr. Ozone visiting the local watering hole. Decent signal but some adjacent slop QRM. (Valko 2 Sept.)

7470U, Classic Rock Radio, 0415-0550, Very good signal. (Valko) (Hodgson,TN.USA)

15070, Alfa Lima Int. 2300-0700 initially quite a good signal but level dropped off sometimes to nil from 0200-0400. Back up to fair level from 0500-0700. Alfred mentioned an e-mail from Chris Hambly in Australia. Seems like the upper freq worked better to Aus/NZ then to the USA, this morning.(Hodgson TN. USA)

UNID, 15790, UNID, 0640, Very weak station. Heard male anccr and mx. Possibly R Blue Star from the Netherlands, but too weak to work with.(Hodgson, TN. USA)

15795, R Borderhunter, 0600-0715, R Borderhunter is now in AM on 19m, previously only broadcasting in LSB. Fair signal. Very nice audio. Good mx selection. Many mentions of ID and e-mail address. Sign off @ 0715. Operator said "I must stop now, breakfast is ready." (Hodgson TN. USA) (Valko 2 Sept.)

NEWS:

>6276.2 Swinging R England 04.47-17.50 430400 E, oldies<

This log for Sunday was in fact the return of WNKR. Over 21 phone calls received and 8 e-mails !! (so far)

E-Mail : WNKR@37.com

An address for Radio Rode Baron from the East of the Netherlands? Anyone?

This weekend saw a special event station broadcasting live from the DX-camp in Gronau, Germany: RADIO AQUARIUS. The station can be reached via Postbus 9, 8096 ZG Oldebroek, Netherlands.

The EAST SIDE RELAY SERVICE WILL BE ON AIR NOW EVERY WEEKEND (sunday) 48 metres (6260 or 6270 kHz) . Please give the information to all FR operators that we are on air for 15.-DM or 10 US Dollars / hour on 48 m or on 95.0 MHz local FM ! We are on air on shortwave with 80 Watt and on FM with 500 Watt ! We relayed Radio Marabu every 4th saturday on FM and different stations on SW on sunday `s on shortwave ! Last sunday was Lord Radio and Powerplay FM on air via the East Side Relay Service ! Addr: East Side , P.O.Box 1136 , 06201 Merseburg , Germany

I will let you now that we will start with broadcasting on 2 september 2001 in the 41m,band on 7470kHz. We will start on 04.00 UTC time, first for America and other outside country's in Europa in S.S.B. mode and then on about 07.00utc time we will repeat the programm for Europa in A.M. modulation. You understand that we ONLY give you classic rock music and we hope that you enjoy the music,i think there a lot of older listeners on short wave that like this kind of music. You can also look for info on our webpage ; <http://www.geocities.com/classicrockradio>

We will use the Po.box 663 in hoogeveen citycode 7900AR netherlands. Set on the letter of course Classic Rock Radio because there more stations that use the same po.box663.(alfa lima,bandonica,votn,enterprise, E.C.H., union, astoria). Also e-mail for reports etc is always welcome.

RCNW Camp in Gronau (Sep 1st and 2nd, 2001)

The 2001 RCNW camp in Gronau - a very nice camp. The camp was located at the coast of the 'Driland-See', only a few hundred meters away from the border.

The listening-base was inside the club station of the local surfing school. And so did the participants, surfing on the waves ...

The official start was at 1200 local time on saturday and lots of participants showed up there until the late evening. Dr. Tim will provide a complete list as usual. Lets say one third of the visitors were from Holland. And lots of the participants were OPs or ex-OPs, only a few 'pure listeners'.

The weather was mostly fine, so it was no problem to build up a barbecue, a few antennas and the tents. Those without a tent used one of the several hostals nearby or did their sleep inside the club room. The day ended at 0300 in the morning when Klaus, the organizer switched the main power-supply off.

Mr Cupido did a special transmission from the camp under the name Radio AUARIOUS on 6305 kHz. You were able to hear several guests behind the mike, including Titanic, Dr. Tim, Radio Yesterday and some more. Unfortunately its impossible to DX with a running tx nearby ...

SRS Germany wanted to hear the new Voice of Biafra, a new clandestine at 12120 kHz, but that was near the second harmonic of Aquarius on 12610 kHz. And even the other harmonic of 25220 kHz gave very good signals.

The same problem on sunday morning again ... Sunday morning started at 0730 with some pirate radio dx catches on mw and lots of catches on FM and even a few catches on SW. After lunch Mr Cupido tuned the tx to 6200 kHz and we had Aquarius again on all frequencies ...

Sunday had less visitors and bad weather, too at some times. Because of local QRM and fewer guests Radio Dr. Tim and SRS Germany did a trip to Holland in order to visit the OP of Radio Mario, who did a live txm under 'de Casanovas' from the nearby studio of Radio Verona. Several other OPs showed up there, including several MW stations. And once again, Radio Dr. Tim has been heard behind the mike of 'De Casanovas'. Believe it or not, they formed their station name after the LP 'Wir sind die Casanovas' which seems to be their into-music.

The camp ended after 1400 on sunday when most visitors already were gone.

Thanks to Klaus, Ralli and Ingo for organizing everything for us. (Including descriptions how to find the camp, meal, meat, beer, lunch, cleaning etc ...) Its possible, that the camp will take place at the same site next year.

***Hope to see you there !
Martin - SRS Germany***

Logs from Dave - over there in the states.

8 September 2001: Went up to the usual Mountain micro-DXpedition QTH for the R. Borderhunter low power test. Set up a Dipole cut for 15795 khz and Beverage cut for 2 wavelengths of the freq. Was ready to go by 2120. Conditions were pretty decent but not spectacular.

15794.87 R. Borderhunter, *2145:00-0005, OC came on at 2139:45 and programming commenced at 2145:00 w/usual spaceflight countdown, and into synth music at 2147. Played the song "Feel the Heat" often but also played songs by The Rolling Stones, and Bill Haley and the Comets. Besides the IDs, talked about the test, thunderstorms moving away, and the power during the reductions. Lowered power several times. 100% copy throughout even down to 100 watts. Even though not all signal meters are calibrated the same, I had a peak of S-9 +10 at 2203, but down to S-4 at 100 watts. Went off from 2232-2236, and came back on in LSB on the exact same freq. "Feel the Heat" played again many times along with "Reggae Nights", "I Want You to Want Me" by Cheap Trick, and "Radar Love" by Golden Earring. Took e-mails during the test and gave the e-mail address once or twice. Said got 6 e-mail reports. A lot of talk about the power of course. Reduced power in increments of 100-80-50-20 watts, then between 8 and 10 watts, 3 to 5 watts, 800 to 1000 milliwatts, 500 mw, 100 mw, and 30 mw!!!! Gave comments like "Almost no power", "This is real DX", "Can you copy me", and "CQ Delta X-ray". Said was monitoring power on the xmtr meter and an external meter. Around 500 mw said he had no reading on the xmtr meter!! At 2348 said the "External meter is almost dead now". Was 100% copy until 800-1000 mw. Still about 90% copy then. About 30-40% copy at 100 mw. At 30 mw could only just barely make out announcements at 2352 and 2359-0000. Amazing. Immediately at the start of the test broadcast, I realized the Dipole was better

than the Beverage and used the Dipole exclusively. A special thank you goes out to The Borderhunter for making this most memorable DX experience!! Ranks right up there with hearing the Falkland Islands in 79'. And congratulations to David Hodgson who had even better signal than I !!! (Valko 8 Sept)

15069.93 Alfa Lima Int., 0005, Just before my MD ended, I caught ALI. ID, e-mail. Mentioned people liking a lot of Beer and "don't forget to call". Usual dance music. Found //6303.63 using 122 foot Beverage. Of course 15069.93 was better. (Valko 9 Sept.)

After the R. Borderhunter low power test, decided to head out back up to the Mountain a couple hours later for another round of Europirate DXing!! Receiver: NRD-535D, Antenna: 304' Beverage laid out on the ground at 50 degrees., Duration: 0440-0710 UTC Weather: Perfectly clear, warm 65 degrees F!!

5805.04 R. Free London, 0446-0453, End of song then 2 men with song announcement and talk about various C&W and Pop artists. 0448 nice R. Free London jingle, Pop/Rock song, 0450 more song announcements, talk about the DJs coming up in future broadcasts and nice ID with SW freq, then into more Pop music. Best signal heard yet, even better than last Winter. (Valko 9 Sept.)

6210.07 R. Marabu, 0455-0544, End of song then dead air to at least 0500. Audio back later at 0512 recheck. Pop music, simple R. Marabu ID by M between songs at 0521. M in GM again at 0541, canned announcements over music including addr, nice ID at end 0544 "All over Europe, R. Marabu". Decent signal but QRM from another het about 30 hz off. (Valko 9 Sept.)

6295 R. Northlight (pres.), 0459 with OC, then start up of program with easy Dutch or German song. Continued nonstop music to 0511 tune out. Came back at 0603 and heard more nonstop Dutch or German music to 0611. Not one announcement noted. Several UTEs here causing QRM, sometimes completely wiping them out. Too weak to ID anyway. (Valko 9 Sept.)

6303.68 Alfa Lima Int., 0512-0547, Usual Pop and Dance music program. ID and announcements, talk about the equipment. Alfred said he hit his finger with a hammer and was in pain!! Another ID 0547. Good signal. There were 6 stations on 48 meters at tune-in: this, 6295, 6276, 6220, 6210, and 6205!! (Valko 9 Sept.)

6205 UNID. 0512-0531*, Pleasant Dutch or German songs with very short announcements occasionally by M between or over songs. Couldn't get an ID. Fairly weak with SSB QRM for a time. Off at 0531 and didn't come back. Who was this?? (Valko 9 Sept.)

6235.70v R. Black Arrow, 0532-0551, Instru. mx w/ID at 0532. Songs "I'm on Fire" by Bruce Springsteen and "With or Without You" by U2. Nice ID at 0550. Dance music. Fair signal. Drifted down to 6235.55 by 0551. (Valko 9 Sept.)

7446.17 Weekend Music R. 0553-0641, Pop/Rock music, many many live and canned announcements. Acknowledged listeners letter. Although it was quite strong, it was difficult to copy because of the muffled audio. (Valko 9 Sept.)

6276.35 Swinging R. England, 0602-0628, Really nice signal while scanning the bands when I first got started. Comedy sitcom program at 0602. Back to music at 0620 with songs by Little Richard and Lou Rawls. Canned ads, jingle. Fading by 0628. (Valko 9 Sept.)

7464.91 Laser Hot Hits, 0615, Roy Orbison, 0616 man announcer, canned jingle, music with canned romantic dialog. //6220. This freq hammered by 7460 slop. 6220 was very good. (Valko 9 Sept.)

15807.53 R. Black Arrow, 0648-0657, Addr given phonetically. Song by the Eurythmics, then "Dream On" by Aerosmith. Pop/Dance music, 0657 ID. Still going at 0706 recheck. Extremely weak, probably just because of non-resonant antenna. (Valko 9 Sept.)

7434.07 BBMS, 0700, Gary Stevans talking about crystals, gave e-mail addr. Said "was a bit of a warm-up program". Greetings to German listeners. Good signal but CW QRM. (Valko 9 Sept.)

Not a sign of East Side R. on either 15815 or 6270. Anyone hear them or didn't they make it??

Not a bad night of DXing. I'm looking forward to the "extended" listening periods as sunrise gets later and later, but it won't get easier than it was this morning!!!

Have a good week. Best 73's Dave

NEWS:

Last weeks question concerning the danger of SRSnews gave us a lot of response. The general answer was: No, not more dangerous than a printed magazine. We will anyway continue to provide info for subscribers and the info printed on the net. Thanks for all replies!!

From the Red Baron we got this letter:

I want to thank the listeners for the reception reports and I want to ask who knows how to modulate a rig with EL 34 in the proper way. rode.baron.48@wanadoo.nl

The address to Swingin' Radio England?

Radio Dr. Tim now uses the SRS Deutschland address in Merseburg. The address in Dortmund is still valid, but Merseburg seems to be faster.

Logs from North-America

I would like to say thanks to the folks of the European pirate community, who expressed their condolences to me, concerning the tragic events of the week, here in the USA. You don't know how much it is appreciated. /Hodgson

The tragic events of the past week are heavy on our minds and present during every waking minute. Knowing that that feeling isn't going to subside for a very long time no matter what one does, I thought I'd do something "normal" and spend a few hours up at the micro-DXpedition QTH listening to Europirates. / Dave Valko

- 6220 LHH (p), 0545 Sept 16, In there with mx, but very weak.(Hodgson,TN USA)
- 6238.63 Jolly Roger R. Int., 0337-0700+, Usual relay of C&W music program. Techno Pop after 0600. Played a Japanese-like song at 0618 followed by man announcer with mention of Chris Williams and Jolly Roger R. Int. Dead air at 0622, then into relay of Britain R. Int. at 0623. Many IDs and jingles for BRI. Talk about old off-shore radio stations. Mentioned "...BRI today is 48 meters shortwave and 107 FM. Your oldtime friend is back, BRI".Good signal, especially early on. (Valko 16 Sept./Hodgson, TN USA)
- 6266.55 Station, Spur, or Image?? 0537-0700+, Very weak het. Was getting some music. The audio made it sound like a spur. Barely strong enough to recognize songs. Was someone here then?? (Valko 16 Sept.)
- 6276.42 Swinging R. England, 0443-0653, Been playing Classical music the last 15 minutes at least. No announcements. Still playing Classical music at 0653 recheck and weaker by then. I've noticed over the last several weeks that this is very strong at around 0500.(Valko 16 Sept./Hodgson, TN USA)
- 6295 Studio Northlight (pres.), 0415-0700+, Weak and weak audio as well. Lively Pop song when I first tuned in. Pleasant peppy Dutch song at 0605 recheck. The signal stayed in throughout but never got any better. Was hammered by UTEs as well. (Valko 16 Sept./Hodgson TN USA)
- 6299.96 Mike R. Int., 0524-0624, Must've just signed on as it wasn't there at 0518 when I spun through the band. Several songs in a row; "Summer of 69" by Bryan Adams, "Lets Dance" by David Bowie, and "Cold as Ice" by Foreigner. 0540 talk about the freq and QRM in Europe, checked out computer receiver in Sweden. Nice clear ID and freq at 0541. Rec. report request with e-mail address, phone # 0031-6155-60932 and ID at 0543. Then in GM. Very strong at tune in. Moved down to 6298 at 0550 but was getting UTE QRM. Back up to 6300 at 0600. Another ID during recheck at 0624. Just an open carrier at 0638 check, and then gone. Sign-off at 0638??. (Valko 16 Sept.)
- 6303.7 Alfa Lima Int, 0447 16 Sept. Alfred audible on both freqs at the same time. A little better on 48m at first, then power house signal on 19m by 0530. (Hodgson TN USA)
- 6305 Mike Radio, 0500 16 Sept, Fair strength, but all sorts of QRM. Did catch ID, and phone #. At 0515 he moved down to 6300 to avoid the QRM, the 6298. (Hodgson TN USA)
- 6306.65 Alfa Lima Int., 0523, Pop/Dance music, //15069.93. Alfred gave the snail mail address at 0559. Again with e-mail address, ment of 19 mb, and ID at 0637. This freq better than 19 meters. Both were still in at 0709 but extremely weak. (Valko 16 Sept.)
- 6395 Laser Hot Hits (pres.), 0554-0630, Big signal here at tune-in, but no audio. Finally audio on at 0628 recheck, sounding like a program of oldie ballads. Man announcer with song announcements, possible ID, jingle, and back to music. Was NOT // to the other freqs.(Valko 16 Sept.)
- 7434.04 BBMS??, 0645-0713, "Shakin' All Over", "She's Not There" by The Zombies, "Can't Explain It" by The Who. Man between songs sounded like Gary Stevens. ID at 0710 sounded like "...Radio ?? , shortwave worldwide", but just couldn't copy. Decent signal but getting nasty splash QRM from way down below on 7415. (Valko 16 Sept.)
- 7449.80 R. Nova, 0350-0658, Oldies Pop music, IDs, jingles, talk about R.Caroline and gave the R. Caroline e-mail address. Gave their own address as Rueil France. 2 DJs talking about songs at 0658. Very strong but getting slop-over QRM from 7440.(Valko 16 Sept./Hodgson TN USA)
- 7464.9 Laser Hot Hits, 0555, Nice ID, talk about Tony Jones who requested a song, //6220.03 which was good. This freq QRMed by slop from 7460, but still readable. (Valko 16 Sept.)
- 12256.54 Wrekin' R. Int., 0608-0722, 90's and 00's Pop/Rock music such as The Wallflowers and Sugar Ray. Jingles between songs. Canned dialog between man and woman with woman giving mention of "...one World, one radio station, your free Radio ?? ", but couldn't copy the name. A relay of another station?? Seemed to go into an 80's format program after 0700 or so. Nice ID with freq and e-mail at 0707 "...Welcome to W.R. International the place for nostalgia....Good morning this is shortwave radio on 12256 khz and.... WRInternational.net...". About the clearest ID I've heard on this yet. Fady signal. Sometimes good, sometimes nearly completely gone. (Valko 16 Sept.)

- 15070, Alfa Lima Int, 0500-0700 16 Sept, Big signal after 0530. Many IDs, hellos and so forth. Annncd that he would no longer broadcast on 19m at night.(Hodgson TN USA)
- 15794.87 R Borderhunter, 0545-0704 16 Sept, Signal was so strong I could hear it with a small travel portable inside the house, with only it's 1/2 meter whip. On the Icom, it was near perfect. Mentioned wx was clearing up and played Lola by the Kinks. Many IDs.(Hodgson TN USA / Valko)

=====

NEWS:

The tragic situation in the U.S.A and what we feel about it can not be described with words, our thoughts are with you, brothers and sisters. Swinging R. England played instrumental music all weekend.

A warning to all pirates, due to this attentate towards U.S.A, higher activity from the PTT and equal authorities can be expected also in Europe.

A letter to Radio Armada sent to Postbus 221, 7700 AE Dedemsvaart, Netherlands has been retuned after 3 weeks with the remark 'Onbekend' (Unknown). The website of R Armada closed down some time ago, no answer from two different e-mail addresses.

Home sites to visit:

Bandonica: <http://listen.to/bandonica>

Enterprise: <http://radioenterprise.glow.nl>

Bandonica & Enterprise together: <http://freeradio.glow.nl>

The address for Radio Bloemenwekerij that was published until now is partly wrong. The zip is not 7160 AB but 7160 AC. Spaceman has another (lower) Postbus (73) than Bloemenwekerij (145) , so it has a lower zip (7160 AB), too.

Studio Northlight has new adresses: webpage: <http://www.StudioNorthlight.de> & e-mail : mail@StudioNorthlight.de

Reflections from Mr Stefan P.

Seems like 41 metres are getting more and more popular, the conditions on this band were almost as good as some 15/20 years ago when the band was almost as crowded as the 48 m band. At about 10 hours UTC the cxs on 48 m were deteriorating, while the two 41 m stations kept up their signal strengths very well. Let's hope the good ol' days are coming back...

Also, Wrekin Radio Int'l had a crystal clear signal on 12256 kHz. With a signal like that, it's a pure pleasure listening to this genuine and dedicated Free Radio station. They did a very nice and memorable tribute to the victims of the recent US disaster where almost 5000 people were killed. Included sound clips from a speech by president George Bush and news reporters who became eye witnesses to the collapse of World Trade Center.

Talking about old days...what nostalgia it was to hear Radio Delta from Elburg on 6302! I think it was on the day 17 years ago I heard the station for the first time (however, haven't been able to check my record since I'm abroad at the moment). The station was one of the many popular 227 m stations back in the 70's and then moved to shortwave in the 80's like many others did. In the programme we were told that they were running on very low power which I believe was a BIG joke...the signal was impressive with hardly no fading...just like that day some 17 years ago... Anyway, an e-mail address was given out as radiodeltainternational@hotmail.com. And the same old Elburg address is still in use: P.O. Box 41, 8080 AA Elburg, The Netherlands.

Logs from North-America

- 5805.03 RFL, 0649, End of talk by man, ID jingle, into "Amanda" by Boston. This weakening too at this time. (Valko 23 Sept.)
- 6205L Studio Northlight, *0500-0520, Pleasant instru. songs w/man voice-over announcements. Many IDs, freq, morning greetings, phone hotline number. "Studio Northlight from Germany on 6205 kcs in the 48 mb". Thought heard mention of 50 watts. German announcements as well. Into Pop music program at 0511 with "That's All" by Phil Collins, followed by "Back in Black" by AC/DC. Canned ID jingle at 0518. Poor to fair, but clear. (Valko 23 Sept.)
- 6210 R Borderhunter, 0530-0614 23/9, Fair strength, but under noise floor. Did recognize anncr voice. There was another station just 200 hz away. Don't know if it was a pirate or not.(Hodgson, TN USA/Valko 23 Sept.)
- 6210.17 R. Nova, 0454, Man at tune-in with what sounded like an e-mail and snail mail address, usual jingle at 0456, talk by man, then into unrecognizable song. Fairly weak and very difficult to copy. Fortunately the jingle came through. (Valko 23 Sept.)
- 6220 LHH, 0642 22/9, Heard saturday morning w/classic song "Love Hurts" Weak. Heard also this morning but too noisy for audio.(Hodgson, TN USA)
- 6240.5 R Cassanova, 0510-0541, Nice signal! Remarkable that I could hear this station so well, under these circumstances. By far the best signal on 48m this morning. German and Dutch folk mx. Annrc gave phone # in German @ 0518. Top notch audio, excellent modulation.(Hodgson, TN USA / Valko 23 Sept.)
- 6261.20 R. Dr. Tim, 0547-0613, Pleasant enjoyable Dutch instru. and vocal songs with near continuous announcements in GM and EG by Dr Tim. Many IDs ("from Germany"), freq, Merseburg address although it sounded like Elsburg, greetings ("Good morning, goodnight"), many mentions of the USA and Canada. Mention of "Pirate radio doctor". Possibly mention of the Wuppertal address at 0555. 0608 Canned ID jingle repeating over and over increasing in pitch. Fair at tune-in, but very very weak and barely any audio by 0627 recheck. (Valko 23 Sept.)
- 6276.42 Swinging R. England, 23.30-0647, Latin American-like music, jingle, canned man with ment of mediumwave band and brief radio drama with another man, Pop song. 0645 jingle and man giving e-mail address, and into Madonna song. As usual, good early around 0500, weakening after 0630. (Valko 23 Sept./Hodgson, TN USA 22 Sept.)
- 6294.92 R. Foxfire, 0527-0546, Instru. music, dead air, 0529-0532 Punk song, brief dead air again, 0533-0539 "The Story of a Young Heart" by A Flock of Seagulls, 0537 ID and said was "playing a few records this morning". Into another Pop song. 0544 ID announcement again with mention of "All over Europe", phone 0031-291-00079, and e-mail addr. Must've caught sign-on. Fair, mainly clear. Drifted down to 6294.83. Still in at 0614 recheck. (Valko 23 Sept.)
- 6303.69 R. Geronimo via Alfa Lima Int., 0520-0527, Man talk about stations and DXing, acknowledged reception reports. Ytterby Sweden address at 0524, then e-mail address. Canned ad for British DX Club. Nice canned echo ID and address at 0525. Into "Listen to What the Man Said" by Wings. Fairly good and still in at 0640 recheck. (Valko 23 Sept.)
- 6303.7/15070, Dutch Relay Service (pres), 0450-0640 23/9, 48m under static 19m killed by flare. Only weak disturbed carrier with fragments of mx on 19m. (Hodgson, TN USA)
- 7434.03 R. Ozone Int., 0643, Sounded like Mr. Ozone. This was weak too and nearly impossible to copy by 0653!! Highly unusual. (Valko 23 Sept.)
- 7450.22 UNID. (R. Nova??), 0617-0625, Canned ID which sounded like it might've been R. Nova, but couldn't be sure. Then talk by man, but just too weak. 0619 C&W-like songs. Man announcer briefly. Was this really Nova?? (Valko 23 Sept.)
- 7464.91 Laser Hot Hits?? 0641, extremely weak with several 7460 slop QRM. Imposs. by 0651. (Valko 23 Sept.)
- 15069.97 R. Geronimo, 2315-2359 Man talk about Europirates from the old days, acknowledged listeners letters, ads for the World DX Club. IDs and radiogeronimo@hotmail.com e-mail address and Ytterby Sweden mailing address. Into "Black Magic Woman" by Santana with ID at beginning mentioning program "Classic Rock Show". More IDs, jingles, into songs by Supertramp, Peter Frampton, Steely Dan, etc. Add for British DX Club. Dutch Relay Service ID 0000, and then 0001 Alfred with Alfa Lima Int. ID and said was closing down. programming Fairly good with slight variable freq. (Valko 22-23 Sept)
- 15794.87 R. Borderhunter (pres.), 0655, An extremely weak signal right on his freq. Bits of strange music. (Valko 23 Sept.)

NEWS:

I have received questions about next issue of Pirate Reflections. Well, as I have no extra articles or information to bring to you, it has to wait. If you want to change these parameters, send us articles!

Saturday night RADIO CASANOVA was playing jingles for 1636 kHz, the medium wave frequency formerly used. E-mails to radiomario@hetnet.nl.

FRS HOLLAND will be back next weekend from Saturday afternoon to Sunday evening on 7450 kHz. The 4-hour-programme will be repeated over and over again. The 21st birthday transmission is scheduled for late October.

Studio Northlight Relay-Service

Each can use our new Relay-service effective immediately. Your own programs via our transmitter at favorable prices. That on- or two-hour programs are broadcasted two times. For the transmission we're using our ICOM-transmitter with an output-power of 40 watts (AM) and 80 watts (SSB). Here now a record for the radiation of an one-hour program: 5.00-6.00 UTC 6205 kHz in SSB, repetition from 6.00-7.00 UTC in AM-mode. You can of course also choose other frequencies in the range of 6200 to 6400 kHz. The broadcasting times can be of course variable.

And now the best, the low prices:

An one-hour transmission for DM 20,- or US\$ 10,-, a two-hour transmission for DM 30,- or US\$ 15,-. All programs are for two times on the air.

If you're interessted send me a email: relays@StudioNorthlight.de

No address valid for Radio ARMADA, Postbus 221 in Dedemsvaart failed and so did the former address, Postbus 9 in Lemelerveld. Both returned as 'Onebekend'.

Logs from North-America

5805 RFL, 0540, Rock music, live woman announcer at 0542 with nice ID and freqs "You're listening to R. Free London transmitting on 5805 on the shortwave and on 1125 on the mediumwave....". Talk about Ireland, then into Alanis Morrisette song followed by another song. Fairly readable. (Valko 30 Sept.)

6199.24 Someone testing?? 0659, decent strength open carrier, then went off at 0701. No audio. (Valko 30 Sept.)

6204.97 R. Borderhunter, 0620-0713, Noted open carrier off and on several times after 0603, on with Pop music at 0620 recheck. Brief song announcements at 0630. 0637 appeared to thank someone for a QSO. Finally ID with slogan, snail mail and e-mail addresses at 0652. Still barely in at 0713 with "Drivers Seat" by Sniff 'n' the Tears. Fairly weak but clear. (Valko 30 Sept.)

6205, R Borderhunter, 0615-0630 30/9, Announcement then U2 "In the Name of Love" @ 0615. Fair only briefly, before the band started fading.(Hodgson, TN USA)

6238.64 JRRI, 0705 open carrier, then 0706 start up with instrumental Hillbilly music, 0707 brief ID and song announcement " ?? on Jolly Roger R. Int. for the next hour. Hope you enjoy the music. This ones from Charlie Walker and its called ?? ". 0709 song announcement and several IDs with Waterford address, then more C&W music. Fairly good. (Valko 30 Sept.)

- 6276.17 Swinging R. England, 0645, "Leader of the Pack", 0703 "I Left My Heart in San Francisco" by Tony Bennett. Usual jingle ID. Into another oldie. (Valko 30 Sept.)
- 6276.2, SRE, 2300-0600 29-30/9 In there but very weak. Only traces of audio, with MX and British annr.(Hodgson, TN USA)
- 6300.37 UNID. 0646, Lively instrumental music, 0648 brief announcement by man which I couldn't copy, then signal gone!! Fairly strong but low audio. Anyone know who this was?? (Valko 30 Sept.)
- 6305.16-6308.21 Cupid R., 0445-0629, End of song at tune-in, then man with announcement including ID as "...Cupid R. live from the...". More recent Pop song what I believe is entitled "I Should've Walked Away" at 0451, into another Pop song, and then at 0454 Alfa Lima Int 6303.06 popped on with relay of Mystery Science Theatre 2000. QRMed by both ALI and SSB traffic at this time. Still QRMed at 0510 recheck when I noted the song "Missing You" by John Waite. Clear of SSB traffic at 0548. "Please Don't Go" by K.C. and the Sunshine Band, "All I Wanna Do is Make Love to You" by Heart. At the end of the song by Heart at 0608, the operator tuned the freq up to 6308.21 (apparently a digital transmitter as the freq jumped up in rapid steps), obviously to avoid QRM from ALI. 0611 man announcer again with mention of "...I'm sorry, I'm afraid...life on the shortwave bands...". Also noted songs "Why Can't This Be Love" by Van Halen, "Break My Stride" by Mathew Wilder, and "We Love the Pirate Stations" from 0624-0628. Fading by 0629 tune-out and gone at 0650 (probably off the air).(Valko 30 Sept.)
- 6303.06 Mystery Science Theatre 2000 via Alfa Lima Int., *0454, On suddenly with radio play (audio from the TV show??), 0456 Pop song, 0458 ID by man. Fair but not as strong as ALI usually is here. (Valko 30 Sept.)
- 7434.11 R. Ozone Int., 0639-0658, Man talk about pirate stations being closed down, into song at 0641. Song announcements ending with ID at 0656, start of Jimmi Hendrix song and continued talk by man with acknowledgements of listeners in Germany.Poor to fair at best.(Valko 30 Sept.)
- 7446.12 WMR?? 0526, Extremely weak het here, no audio. Was this WMR?? (Valko 30 Sept.)
- 7449.80 FRS Holland??? Heard open carrier throughout the listening period from 0505-0715. No audio noted. Heard at home as well. Was this FRSH?? (Valko 30 Sept.)
- 7470U Classic Rock R., 0520-0645, End of song, a few words by live man announcer, and into "I'm A Believer" by The Monkeys. 0523 canned echo ID with address, live man with song announcement, next song possibly entitled "Moonlight Shadow", live man with freq and greeting, into "Jet" by Wings. 0536 man mention of second broadcast, then into "Sunday Bloody Sunday" by U2. Fair with horrible slop QRM from 7465. Was in AM mode around 0645 recheck. (Valko 30 Sept.)
- 7470.06-15 USB, Classic Rock Radio, 0407-0557, Best signal of the night with fair reception. "Wicked Game" @ 0407, "Grapevine" by CCR. Initial downward TX drift. Station ID and address given at 0440.(Hodgson, TN USA)
- 11484.98 R. Enterprise/R. Bandonica, 0528-0609, Blocks of unrecognizable Pop music. Finally man announcer at 0547 with phone number 0031-xxxx-xxx, and ID for Bandonica. 0609 man again with snail and e-mail addresses, phone number again.Very weak and fady.Gone at 0631 recheck.(Valko 30 Sept.)
- 11485 R Bandonica/Enterprise, 0400-0630, Signal just a het till 0500 when audio started coming through. Superior modulation, allowed for copy. Mailing address (Hoogeveen) was given @ 0620 then hotline # and ID. (Hodgson, TN USA)

NEWS:

Studio Northlight was raided at Saturday 29th 2001 during the transmission on 6300 kHz. At 13.23 UTC 2 men from the german PTT and 2 men from the local police comes to the studio. The used transmitter from ICOM and the power-supply was seized by Mr. Adamski. I have change some words with him and he said me that only the normal control was the reason for the raid. Studio Northlight caused no troubles with the neighbours or other things. The original document from Mr. Adamski is on the webpage at <http://www.StudioNorthlight.de> . And many thanks for all the emails, phone-calls and greetings from all the stations at Saturday and Sunday. I have heard the special program from R. Doctor Tim at Saturday, and the greetings from R. Borderhunter, R. Eastside and R. Veronique at Sunday.

Originally Studio Northlight intended to be ON AIR over the weekend on 6170, 6205 and 6300 kHz

> from Spain : Poor signal as usual and a lot of cracking in the background due the stormy weathers ... [Also the German Weather Service announced the occurence of magnetic lights .. Solar Flux at 288 per Play DX ..]

> from the USA : Poor propagation over northerly latitudes, due to active to minor storm geo-condx. Boulder A index @ 0600 was 21.

The Radio East Side Relay Service relayed a new program this weekend :

Radio MERKUR is an FM pirate from the Nordschwarzwald (nothern part of Black-Wood).E-mail : radiomerkur@bluemail.cc

Website : <http://radio.home.ro> Radio MERKUR has not yet an official address. But SRS-Germany can forward your reports until Radio MERKUR finds an address.

Radio AL Int. intended to relay a station Called Mystery Science Radio. Their address is: PO BOX 69, ELKHORN NE, 68022, USA. They also send verifications for postings in the A*C*E NEWSLETTER. AL Int intended to "launch them into the 15070 kHz frequency somewhere between 22.30 and 07.00 utc. If not we will put them out into the 48 mb somewhere between 06.00 and 08.00 utc"

Radio Enterprise & Bandonica Radio from The Netherlands intended to transmit on Sunday on 11.485 kHz am modulation. They wanted to start on 0400 utc

Radio CITY tested again at 09 UTC on sunday on 21475 USB.

Dutch Diamond Radio was a operation of VotN and RECJ as it seems.

New station radio telekom (in QSO with Grenslander) from region of Clogne as per Dr. Tim. Recent station Radio Kölle was from Cologne, too.

LHH has been heard in Germany at the new frequency of 3970 kHz, but the signal was weaker as on 6220 kHz.

Mysterious station RADIO ATLANTIS now has announced an E-mail address: radioatlantis@hotmail.com.

RADIO ADAMSKI is another "new" station from the Star Club Radio circle. Therefore the station can be reached via Postfach 10 06 21, 45806 Gelsenkirchen, Germany

Madness

I received a telephone call yesterday from T.R. who told me he had to see me about something he had been told. The information he received was from a good friend who we know as "The Sneak" who informed him that RFL had problems at their 1125 transmitter site with 'somebody' sabotaging the mains supply. He wouldn't tell me anymore until he saw me. I then telephoned Mr.Sneak and asked what it was all about. I was told that the RFL staff believed the person responsible for the attack was ME !!!! Unfortunately at the time of the attack, I was in Germany staying with 'Crazy Wave Radio' operator Chris Ise. This is a very serious allegation and one I do not take lightly. I telephoned K.M. the man who pointed the finger at for me the crime. I also called E.M. and D.S. and told them I want to see hard evidence that I carried out the act of cutting the mains supply. All three started to back track and told me I was nothing to do with it. I told all three of them that they have one week to show me the evidence that I did the damage, if not, I will go to the RFL site this coming weekend and smash the equipment to pieces, after all, if I am going to be accused of a crime, I might as well do it ! I know it's a very narrow minded attitude, but sadly, I'm a narrow minded person and at least I'm man enough to admit it. This is the reason for sending out this e-mail, because I want everyone to know I can prove I was out of the country and that and that I will carry out the treat I have issued to the 'core' staff at Radio Free London.

//Andy Walker.

Questionnaire

Just had a thought whilst speaking to Prince Terry of Radio Ozone, seeing as most station operators have no idea on how to please their listeners in the way of music or talk and that most operators do their shows around what they like and then wonder why there is zero response apart from being used as a Dx or QSL station, he was thinking it was about time we station operators and presenters set out to find how we can entertain you the listener, so he was thinking the following questions should be answered:

- #1 What age are you
- #2 What type of music do you like. C&W - Heavy Metal - Hard Rock - Soft Pop.
- #3 What artist in the popular music field do you like
- #4 Should "Flash Back" features be in the programming, eg Caroline RNI etc.
- #5 Have "Flash Back" features been none to deathYES - NO.
- #6 Should there be some Free Radio News.
- #7 Would you be interested in a Radio Equipment Buy - Sell - Exchange or Swop feature.
- #8 Would you be interested in a Dx programme!!! if so please give details.
- #9 How do you think presenters, or station operators could be in more contact with you.
- #10 Tell us, in what direction, should Short Wave Free Radio be heading, as a few pointers these could be, Not Just Sundays-Evening Transmissions- Higher Bands. !!!!
- #11 Do you think we should only be on the air as a "DX Catch"
- #12 Do you think QSL cards are of any value.
- #13 Do you think your Short Wave interest is dying

Answers to SRS News or to bbms4ozone@compuserve.com

And if we don't get any response at all then we will know that we are all wasting our time.

Prince Terry, Radio Ozone International

6244.32	JRRI (pres.)	0718	(Dave Oct 7th)
6266.40	UK R.	0635	(Dave Oct 7th)
6275.01	R. Shadowman	0534-0605	(Dave Oct 7th)
6276.26	SRE	0654	(Dave Oct 7th)
6285.97	UNID.	0701-0715*	(Dave Oct 7th)
6299.96	UNID.	0450-0526	IDs sounded like Beacon Radio. (Dave Oct 7th)
6303.58	Alfa Lima Int.	0526,	//15069.97. (Dave Oct 7th)
7434.15	Ozone Int.	0723	(Dave Oct 7th)
7449.83	FRSH	0157-0750	7 Oct, EE/w pop MX, e-mail addresses, just couldn't pull an ID, due to lightning. Weak signal, but with average props, and quiet atmosphere, it would have been a nice copy. (Hodgson, TN USA)/(Dave Oct 7th)
7483.64	R. Atlantis (tent.)	0554-0626	(Dave Oct 7th)
9290.2	Mike Radio	0455-0630	7 Oct, Opening theme and announcements including ID @ 0500. Peak @ 0600 with a good signal here. "You're my Angel" @ 0600, "Wake me up before you go,go" @ 0612.(Hodgson,TN USA)/(Dave Oct 7th)

12256.43 Wrekin Radio?	0210-0750	7 Oct, Very weak, with traces of Pop MX.(Hodgson, TN USA)/ (Dave Oct 7th)
15070 Alfa Lima Int.	2235-0500	6-7 Oct, Good signal by 0000. Signal was quite good for many hours till about 0530, when it dropped off. Many phone calls, including one from SWR. Caller said Jako was missing for four hours, and that probably Aliens had abducted him. (Hodgson TN USA)
15085.73 UNID.	0646-0658*	Rock mx, Off with eletronic Christmas mx medley!! (Dave Oct 7th)

=====

NEWS:

Take care out there now fellow op's. The world is hunting terrorists, and you never know what the authorities does when they can't find any real ones!

The station The Scream has closed the P.O. Box in Rancho Cordova.

Radio Joystick tell us that most "portals" are still using my WRONG Email-adress - the RIGHT one only is chapri@web.de - whatever is written in my mails.

RADIO BLOEMENWERKERIJ also identifies in English as BK Radio. Reports to Postbus 145, 7160 AC Neede, Netherlands.

STUDIO NORTHLIGHT which was raided by the German RegTP September 29th, 2001 is going to make a comeback soon. Phoning in to Alfa Lima International's broadcast October 7th, station operator Martin announced that he has found a new QTH to transmit from. Studio Northlight could return already October 21st with a power of 50-100 watts. Website: www.studionorthlight.de.

VOICE OF NOWHERE was a new name but not a new voice on 48 metres. In the live transmission on 6260 kHz October 7th a hotline number of +31 6xx xxxxxx was announced but few listeners phoned in apparently. They were all watching CNN with the latest news from Afghanistan, the Voice of Nowhere guessed. Emails to kompdeband@hotmail.com. No QSLs available.

New Homepage-adress from Radio Doctor Tim. Because some users have problems with the web-adress www.DoctorTim.de and listen.to/DoctorTim i have created a Subdomain at my Server. The new and full working adress: <http://DoctorTim.Free-Radio.de>
Please change your Bookmarks and Link-pages. And also all 96 pics from the DX-Camp in Gronau 2001 are available.

Harry Helms has established a new pirate list at Topica.com to rapidly spread news about pirate, clandestine, and illegal radio. This list will be 100% spam free and will be moderated by me; I will approve all subscribers to the list. Stations can use this list to notify listeners worldwide about upcoming broadcasters; you can alert listeners minutes before you take to the air. To subscribe, send a BLANK e-mail to: PirateRadio-subscribe@topica.com

Some reflections to the RFL-story:

What a pity to see once more a person that attempts to make real free radio (mind you not pirate radio) being forced to stop. Another event that will all together lead to a less interesting free radio scene in Europe I'm afraid.
Dr. Rör / Radio Torenvalk

Its a pity what is happening with RFL - I have been lucky to cooperate with them in better times! I wish those guys all the best - whatever there will be in future! //Charlie Prince of Radio Joystick

Let's hope for free radio's sake that he's made a misassumption and took one hour more to reconsider.

Logs from North-America

- 6210 R. Grenslender?? 0510, instru. Rock songs. Very short announcement between songs at 0510 with address "...578 in Gronau". Another short announcement at 0517 but couldn't copy. There's a het here that I've heard before that always seems to cause QRM to stations using 6210, and that was the problem with this reception. Sounded like the Grenslender op. (Valko 14 Oct.)
- 6210.05 UNID. 0730, Definite audio here with flute-like music at 0731. Similar in strength to the 6260 station heard earlier. Extremely weak. Who?? (Valko 14 Oct.)
- 6220 Laser Hot Hits, 0619, Rock mx, //7464.9.(Valko 14 Oct./Hodgson, TN USA)
- 6238.63 JRRI, 0738, Some sort of ad while passing through. Still easily readable at 0822. (Valko 14 Oct.)
- 6239.92 R. Borderhunter, 0702-0724, Nonstop (mainly instru.) Dance music. JRRI 6238.66 popped on at 0710:25 making it difficult to copy. JRRI on the low side and RTTY on the high side. 0723 ID and mentioned "Hope you like the music". Strong and clear at tune-in. Faded a good bit by tune-out. (Valko 14 Oct./Hodgson, TN USA)
- 6240.42 Bloemenkwekerij R., 0543-0638*, Nice signal with EG, DT, and Polka music, and the occasional DT and EG announcement. 0546 "Good morning listeners from abroad, this is BK Radio from ?? ". 0626 nice "Bloemenkwekerij" ID and phone number. 0636 greeting to Dr. Tim, ID and morning greeting, continued music, then off. Clear and as strong as Tower R. Freq drifting downward to 6240.28 by sign off. Like David Hodgson, I thought this was Cassanova's too at first.(Valko 14 Oct./Hodgson, TN USA)
- 6260.57 UNID. 0654-0701, What sounded like Pop music. Impossible to copy due to extremely weak signal, but definitely something here. Wobbly carrier varying between 6260.57 and 6260.68. Who was here?? (Valko 14 Oct.)
- 6266.38 UK R., 0503-0736, "She Wants to Dance With Me" by Rick Astley, "He Ain't Heavy, He's My Brother" by The Hollies, etc. Song announcements after every song. E-mail address at 0532. 0736 another ID, song announcements, and ending with ID. Fairly weak. Oddly was already on when I got started and had some QRM from R. Zambia.(Valko 14 Oct./Hodgson, TN USA)
- 6276.38 SRE, 0325-0652, Comedy radio play, Rock music at 0640, usual ID jingles between songs at 0647 and 0652. Decent signal.(Valko 14 Oct./Hodgson, TN USA)
- 6280.83 R. Black Power, 0551-0622, A lot of Pop/Dance songs including "We Go A Little Crazy" by Seal. Was obviously testing as the modulation level was varying dramatically, sometimes lowered to nothing. Nice and strong peaking at S-7!!! Finally DT and EG ID announcement "Very good morning, this is R. Black Power from the Netherlands ?? the program". Another DT announcement at 0621 with ID, possible ment of telephone, couple "Hello"s. Amazing signal but did have some occasional UTE QRM. Gone at 0725 recheck. (Valko 14 Oct./Hodgson, TN USA)
- 6288.22 Tower Radio, 0437-07.35 Oct 14, Weak at first, then up to decent level. Best signal of the night, but under two very loud UTEs (covering both sidebands). Dutch anncr. Tower Radio? I'm not sure. Mentions of Holland. "I can't stop loving you" by Journey @ 0554.(Hodgson, TN USA/Valko 14 Oct.)
- 6300.71 UNID. 0731, Someone here?? Het and possible hints of audio, but difficult to be certain. (Valko 14 Oct.)
- 6305.11 UNID. 0751-0813, Techno-Dance music with very short announcements (10 seconds or so) at 0752, 0757 (possible mention of "radio"), 0758, 0804, 0805, and 0812. Not quite strong enough to copy. Was strong enough to recognize songs though, but I just wasn't familiar with the music. Not even a het at 0821 recheck. Fade out or just off then?? Wonder who this was?? (Valko 14 Oct.)
- 7434.13 R. Ozone Int., 0640-0728, talk by man, later ID at 0729 and into "Man of Action" theme. UTE QRM. (Valko 14 Oct.)
- 12256.44 WR Int., 0717-0819, M announcer, e-mail address at 0750. Another ID at 0819 on recheck. Very weak. No change at 0819 but about 40% readable. (Valko 14 Oct./Hodgson, TN USA)
- 15794.87 R Borderhunter, 0630, "Every little thing you do" by the Police @ 0630. Signal at audio threshold, only. Poor props on 19m this morning. Only het by 0640.(Hodgson, TN USA)

NEWS:

Radio Pandora has a new e-mail: pandoraradio@hotmail.com

The unid on 6305 kHz October 14th 08.03-08.14 UTC played dance music and Dutch language jingles of an "Energy Radio from Central Netherlands". The unid on 6200 kHz the same day 08.21-08.30 UTC played a German pop track with lyrics such as "Wir können stolz auf Deutschland sein" as well as Yes "Owner of a lonely heart". There was a carrier on 6210 kHz audible most of the morning, perhaps something went wrong with the tape for the Radio Marabu relay there?

Alfa Lima schedule for the upcoming 5 months:

Our station can still be found every weekend on the frequency 15070 kHz AM mostly parallel to a frequency into the 48 mb somewhere between 6317 and 6280 kHz AM around 22.30 utc Saturday evening till 07.00 utc Sunday morning.

Sometimes we broadcast a few hours longer.

Also for the upcoming months we will maintain the same schedule but we might be there also from 13.00 till 18.00 utc at Sundays. Also than we have times that we broadcast a few hours longer.

Keep an eye on our announcements in the SW pirates group (info below) for our transmissions on 21890 kHz. As soon we are going to use that frequency it will be parallel to 15070 kHz or to the 48 mb.

Hi, As you know, I've been *trying* to finish the Pirate Radio Stations book.

Many thanks to those who wrote in to me about the computers & radio topic. I plan to write back, but I really need to get this thing finished first.

My next request is: I thought that it might be cool to include a couple of pics of DXers in the shack with receivers, etc. If anyone is interested in sending a pic of themselves in their shack, please send it to ayoder@cvn.net in the next two or three days. I'd prefer fairly high resolution pics (500K+) in greyscale.

Second, I've got some audio from stations over the past few years, but not tons. My location is pretty noisy & I don't have a permanent shack for now (my receiver has been transient). So, I could use audio from stations like Crunch Radio, Voice of the Angry Bastard, VoCaptain Ron, WHYP (although I do have a noisy copy or two around), KIPM (ditto), United Patriot Radio (ditto), Radio Eclipse, Alfa Lima, Bill's Militia, KRAQ, Paragon Radio, Radio FCC, Buckwheat Radio, etc. If anyone (station?) would like to send in a cassette with snips of this (or others) programming, that would be cool.

My add: Andrew Yoder, PO Box 642, Mont Alto, PA 17237, USA

Logs from the North-America

- 6210 R. Grenslander (pres.), 0509-0513*, Man over lively vocal Pop music at t/in and again at 0512, then off. Difficult to tune in as there was another weak station here (as usual) probably R. Fana. (Valko 21 Oct.)
- 6210 R. Marabu, 0620-0630, Rock song, man in GM with ID, sounded like he took a quick phone call saying "bye bye" before going back into Rock mx. Another short ID at 0625. Weak but there. (Valko 21 Oct./Hodgson, TN USA)
- 6214.98 UNID. 0725-0727*, Man announcer over instru. music and then off. Was just below threshold readability but it sounded Dutch. Who was this here??? (Valko 21 Oct.)
- 6220 LHH (pres), 0509 OCT 21, In there, but weak. MX and announcements. (Hodgson, TN USA)
- 6238.61 JRRI, 0728-0745, At first I thought this was R. Stardust Int. reappearing here as he mentioned possibly doing, but turned out to be JRRI. "Spirit in the Sky" 0728-0732, then played canned generic jingles and sound bites over music. 0744 finally clear IDs and announcements over "Dr Who" theme. Said was having the studio redecorated, talk about an Australian group, QTH given as "Rep. of Ireland in the Waterford area". Good signal of course. (Valko 21 Oct.)
- 6244.95 R. Bloemenwekerij, 0503-0520*, Nonstop pleasant Dutch songs, finally nice ID at 0515 in EG and DT, and address where "listeners abroad" could write. Quite strong. At 0517 it appeared the carrier began to distort just terribly or it was a UTE right on the freq. I'm not sure which. When the distortion appeared, I was unable to detect the signals carrier which leads me to believe it may have been the station and not a UTE. (Valko 21 Oct./Hodgson, TN USA)
- 6266.38 UK R., 0501-05.15, Man with address and ID, into "Sound Your Funky Horn" by KC and the Sunshine Band. Poor to fair but readable. Gone at 0539 recheck, so transmission to NA?? (Valko 21 Oct./Hodgson, TN USA)
- 6269.88 R. Scotland Int., 0651-0719*, Dance music, 0653 dead air, 0654-0658 "Schools Out" by Alice Cooper, 0658 man with song announcements, ID, talk about problems with his equipment, Beilen Netherlands address. 0659-0704 song by Uriah Heep. 0704 song announcements again, ID, said was a test transmission, mentioned having problems, gave QTH sounding like "north of the Netherlands". 0715-0717 "The Story in Your Eyes" by The Moody Blues. More announcements at 0718 and said was going to try either 6238 or 6257, "we'll find it out what it is". Oddly enough I had a very weak het on 6257 earlier at 0521, but didn't hear any audio. Very nice signal and clear here. Fortunately the numbers station on this freq wasn't on. (Valko 21 Oct.)
- 6269.89 UNID. 0805 just an open carrier, maybe RSI testing again. Not there at 0819 recheck. (Valko 21 Oct.)
- 6276.41 SRE, 0627, Usual comedy skit type format. Only weak here. (Hodgson, TN USA/Valko 21 Oct.)
- 6295.04 Mike R., 0821, ID and Wezep address, e-mail address, IDs and addresses again and mention of yours truly sitting in my car!!! (thanks!!). Into song by Sting. (Valko 21 Oct.)
- 6295.95 Spaceman R., 0432-0710, Live hard Rock song, 0443-0446 "Morning has Broken" by Cat Stevens, 0446 long announcements by Major Tom in EG and DT with mention of "Morning has broken in Europe, especially in Holland", greetings to listeners and DXers, ID "on a freq of 6296, this is the Spaceman, on the east side of Holland", UTC TC, also mention of "the old country", broadcasting to NA, song announcement. Into Polka version of "Mickey Mouse" with "Frankenmuth" Michigan replacing "Mickey"!! 0452 Major Tom again with song announcement, ID, and another Polka. 0454 UTC TC and ID again. 0710 ID and song announcement in Dutch at recheck. Nice signal peaking at S-9, stronger than Geronimo (presumed via ALI) above!!! Some slight UTE QRM. (Valko 21 Oct./Hodgson, TN USA)
- 6303.58 R. Geronimo (presumably via ALI), 0455-0555, Dance music when first tuned in. 0523 "Riders on the Storm" by the Doors, 0524 simple short ID over the song. 0555 ID with Ytterby Sweden address on recheck. Strong with a little slop QRM from Spaceman R. below. (Valko 21 Oct.)
- 6303.6 Alfa Lima Int. /DRS, 0354 OCT 21, // 15070. Relay of RMS from America. Weak/fair. (Hodgson TN USA)
- 6305.50 UNID., R. ?? Int., 0824-0841, Easy instru. music, then several lively Dutch-like songs. 0831 man announcer in what sounded like Dutch with echo giving ID (couldn't make out the middle word), mention of "meter band", and address, ending with electronic shooting SFX (similar to Laser Hot Hits). Dance song and another pleasant Dutch-like song. 0838 man in echo again but fading quickly by this time. Into a more Bluesy song at 0839. Must've been a fairly high powered transmission if coming from the continent. Thought this was Hit R. Energy again, but the ID was definitely "Radio ?? International". Who was it?? Anyone help?? (Valko 21 Oct.)
- 6305.94 Mike R. Int., 0747, Talk by Mike with mention of R. Dr. Tim being "so strong like a local...very very very strong" (didn't hear R. Dr. Tim), IDs, mention of 6302 and 6295. ID and more talk in EG and DT over the "Man of Action" theme. Pretty nice signal even at this time. No problems copying. (Valko 21 Oct.)

- 6401.66 R. Rob 007??, 0526-0650, Rock music by what sounded like Rush, ZZ Top, The Eurythmics, 2 by The Moody Blues, The Beatles, etc. Also played a version of "The William Tell Overture" from 0646-0649. Short announcements by man after every song. Announcements at 0602 and 0611 included an apparent address. Unfortunately I couldn't copy any of the announcements as they were at a lower level. Poor to fair strength with nasty UTE QRM below. Who was this?? (Valko 21 Oct./Hodgson, TN USA)
- 7444.08 UNID. 0801-0818*, Man announcer over music at tune-in. Rock music, more announcements with possible ID at 0807 sounding like "This is Radio (four syllables)..." but couldn't comprehend. Long announcements from 0811-0817 with possible mention of "meterband". Except for the apparent ID, all announcements sounded like GM. Went off rather suddenly at 0818. Quite weak. Anyone know who this was? (Valko 21 Oct.)
- 7479.95 R Borderhunter, 0612-06.18, OCT 21, Good signal. Techno intro MX.ID @ 0616. "Smoke on the Water" Deep Purple @ 0635.(Hodgson TN USA/Valko 21 Oct.)
- 7479.98 UNID. Benelux?? 0733-0800, Man talk at tune-in over instru. Rock music, continued music at 0755. Man again at 0757, what sounded like canned announcements, then live man once again. Way too weak to copy but was strong enough to maybe recognize songs. Was this R. Benelux?? (Valko 21 Oct.)
- 7489.97 BBMS/Ozone Int., 0621-0845, announcer Buster Bloodvessel with talk about their listener questionnaire, said got a new reel-to-reel player, then played recording of an old station. Was playing more recordings later at 0845. Nice signal and still good when I left.(Valko 21 Oct./Hodgson, TN USA)
- 9289.71 UNID, 0642, This one is very interesting. Not Mike Radio. Heard pop MX at weak level. Who ever it was, your signal made it to Nashville. Mike mentioned to me that several European Pirates use this frequency the weekends he is not on.(Hodgson, TN USA)
- 11485 R Bandanica, 0645 Oct 21, Best reception yet from Bandanica. Good signal. Usual ultra deep modulation. Mr Bandanica has a sense of humor, he took a recording of Alfred's voice from Alfa Lima Int., and made an e-mail (Hoogeveen) announcement with it. "Mojo Working" @ 0645. Positive Bandanica ID and snail mail address @ 0653. S/off @ 0706. (Hodgson TN USA)
- 15070 Alfa Lima Int./ DRS, 0645 OCT 21, Very strong but disturbed propagation from recent solar flares. Alfred gave live Alfa Lima ID and explained the relay, then went into Mystery Science Radio PX. I heard ID for said relay with host "Cherokee Jack". Alfred cut the transmission short for some urgent reason. He said he wished he could stay on longer, but he must close down for the day.(Hodgson TN USA)
- 15795 R Borderhunter, 0720 OCT 21, After 41m, Frans switched to 19m. La Bamaba, "This is R Borderhunter standing by on 19m", @ 0720. Very nice armchair copy. Strong copy even on little travel radio with only whip antenna. Closing announcements included "The record you have just heard was "Breakfast in America", I have just missed breakfast in Europe! S/off @ 0820.(Hodgson TN USA)
- 21889.7 R Borderhunter, 1312 OCT 20, Techno MX intro, "Go your own way" ID @ 1319 and again @ 1340. "Teen Spirit" by Nirvana. Weak to fair. Local CB splatter on freq.(Hodgson TN USA)

NEWS:

- Quite good conditions this weekend! Aurora coming in om Monday evening, just above the SRS-HQ!! Nice view. 6400 seems to be the new NL-QSO-band? //Jonny

- WMR logged in SRS news for last week was a hoax. This imposter was noted on 6280 last Monday and Tuesday, 6400 Wednesday, Thursday and Saturday.
These were old recordings made last summer, when there were parallel transmissions running.
The genuine WMR was on the air 7446 Saturday night thru Sunday, but was subject to interruptions during the links, which were SSB. A voice which sounded like satan himself, stated "Radio Freedom will be back" "Radio Freedom will return to 6205" and the like. Obviously the SSB op was tuned in and used the breaks in the music to publise his own cause.
This is a very unusual idea for publicity. Radio Freedom was an Edinburgh pirate some years ago. They have certainly made many returns, and although short lived, have been around for many years.

- Radio Geronimo is looking for some DJ's to the station. Interested? Send a demo tape, via SRS-Ytterby.

- Change of contact-address for R.D.I.-Radio DEVALON International - from now on as follows: SRS Germany, -Devalon-, P.O.Box 1136, D-06201 Merseburg, Germany. Please don't write the word "Radio ..." on your envelopes. The next English programme of R.D.I. is scheduled to go on air "somewhere in the 48-m-band" on the 16th of December 2001 starting at around 09.00 h UTC, followed by a - also 1 hour lasting - German language show. For the English programme it is intended, to air your Christmas- and New-Year-greetings to your friends and relatives, spoken in a good audioquality and lasting no longer than approx. 2 minutes on a compact-cassette (CC/MC). Please note, that other audio-carriers (for example MP3 or minidisks) can not be accepted. Send your greetings/cassette-tapes no later than November 20th 2001 to our new contact-address in Merseburg, and you get the chance, to take part in the drawing of a "free-radio- suprise-recording", recorded onto your cassette, so do take part ! One of you can win !! Of course you can also send in your greetings written on a sheet of paper, which will then be read out in the English language programme only, and even when you wrote them in german, they will also read out in English. The German language programme will not include listeners greetings In order to respond quicker to your letters to the station, please don't write any more to the Dortmund-Germany-address (P.O.Box 520112, D-44207 Dortmund).

- The station QUANTUM STATE LABORATORY (P.O.Box 146, USA-Stoneham, MA 02180, USA) is going to verify reports for their recent Euro-relays by ... Mike Radio(?!).
QSL sheets are available for correct reports and postage.
On the other hand there is no postal address for KTVI and R.Doomsday any longer, that means no QSLs anymore for those stations.
Aditonal can be mentioned that the operator of Radio Doomsday died some months ago. Programmes that are aired are in memory of the Op. Reports will be verified via a certified verifier in the states. Reports via SRS-Ytterby.

- Mystery Science Radio, Box 69, Elkhorn Nebraska 68.022 USA.

NEWS:

> from Germany : very late fading in here at 06.45 utc

> from Spain : Well, seems propagation is improving and I'm happy, sorry for my unids, but the quality of the sound and the signal are so poor that it's impossible to understand ...

> from the USA : The disturbed conditions just wouldn't allow signals from a northern path. Certainly hope this doesn't happen during the holidays!!

Mike Radio reports : DURING THE LAST TRANSMISSION ON 48 MB on October 28th, 2001 at AROUND 0.00, MIKE RADIO INT. has been RAIDED. 4 POLICE CARS, ONE OF THE RCD AND ONE VAN, FOR THE TRANSMITTERS. ALL TRANSMITTERS AND AUDIO have been TAKEN away by THEM. IN TOTAL 9 MEN CAME TO THE STUDIO !!! His conclusion after this raid : I WILL COLLECT STAMPS ! You can take a look to the seized transmitters at: <http://www.Free-Radio.de.vu/mike-transmitters/>

Radio VERONIQUE's new email-adress: Shortwave@Netmail.nl

Radio AL International relayed ROCK-IT Radio with its OP Bennie Dingo. Their snail mail drop : Rock-it Radio, P.O Box 5617, Ventura, CA 93005, USA. Email: Rockitradio@aol.com Web page: www.rockitradio.net

Comments from Martin, editor of this issue :

To those dear souls who hurry too much when writing and sending their logs to us, its not R NORTPOOL but R NORTHPOLE ! There are other "examples", too, but these are not so spectacular but rather time consuming for the editors. Like WMR and WNKR at the same time on the same QRG. If you did not hear an ID for a station you want to report - please do not guess but use the "?" !

At it seems it was a nice chaos at 6400 v on Sunday. Everyone was everywhere, incl a new station called ZNOORDERLICHT (Dutch for 'Radio Northlight'). Good for the programm listeners that they do their QSO's outside the 6200-6300 kHz range. Also nice to see that the pirates in the 41 m band found some free frequencies away from 7480 kHz ! Why wasn't this possible the weeks before ?

NEWS:

The LEVEL 48 marathon went out on 3905/7 kHz Friday and Saturday night as well as on 6260 or 6290 kHz most of Saturday starting at 09.00 UTC. Sunday morning 09-10 UTC 6260 and 7480 kHz were used in parallel for Jens Martin and Chris Ise doing a half hour show summing up the project and commenting on the lack of co-operation within the free radio world. Finally, Spaceman shut down the marathon with another programme 10-11 UTC on 6262 kHz. It was a pity that BNL/CWRs modulation sounded low or rather distorted, yet the Level 48 broadcasts were definitely this weekend's highlight. The US Free Radio Network's chatroom was used for discussion Saturday 12-14 UTC.

However, only one listener joined in to talk to Andy Walker who contributed a couple of shows to this Level 48 weekend. SRS Germany's Postfach 1136, 06201 Merseburg, Germany is open for letters to Level 48. That means the station has changed its policy of ignoring the QSL collectors and is now verifying again by card. E-mail: level48@37.com

Mario of RADIO CASABLANCA said that the station would be back next weekend.

WRCR has a new e-mail: wrccr@emailx.net

RADIO WAVES will celebrate its 18th birthday on November 2001. We will be on air via our TX on 41 meters 7450 or 7484 khz possible to be on 11401 if TX is repaired on time we will be on air on most weekends of November except 17th & 18th. We will be really via RADIO 510 INT & EASIDE RADIO RELAY SERVICE. Our shedule is on our web-pages at <http://go.to/rwi>

Radio LISA now uses the P.O.Box of SRS Germany in Merseburg. And also LEVEL 48 does use the Merseburg address from now on. And Radio Merkur and the EASTSIDE RELAY SERVICE do so, too. All have been heard this weekend with these 'new' address announcements. And even STUDIO NORDLICHT can be reached via SRS Germany from now on.

October 27th 2001 station on 6300kHz at 17.45 announced that it is "Free Radio Holland", not "Free R S Holland" as read in SRS log.

Radio Veronique raided at 12th October 2001.

At the 3-day marathon from the 12th to 14th October on 6402 and 6306 kHz the dutch RDR-men Theo Brouwer was at the transmitter location checking the coax-cable between the transmitter and the antenna. It was warm! The station-operator went today through the city with its car and met Theo Brouwer in Markelo. The station-operator ask him why he's not coming to the studio? Theo Brouwer means it's not allowed for him going alone to the studio, because he must pay attention that he will not to be attacked by the persons or dogs, etc. The station now receives a punishment of 5000 dutch Guilders, that's around 2500 Euro. Radio Veronique is finally on the air Sunday, 4th November 2001 from around 5.00 to 18.00 utc on 6402 kHz. The station will employ a new telephone number for the transmission next Sunday, the latest informations you receive with this Newsletter, also in the Newsletter from Radio Doctor Tim. Emails are very welcome to Shortwave@Netmail.nl, the homepage will be still available at <http://listen.to/Veronique> !

RADIO VERONIQUE was announcing its final broadcast today on 6402 kHz and that the station would be back perhaps next year. Reports are welcome at Postbus 49, 7475 ZG Markelo, Netherlands.

In SWpirate there has been a minor debate about the PTT/DTI etc using lists like the SRSnews as source. This is my answer that I added and would like to spread. Comments are welcome if they stay above the belt.

It is a known fact here in the UK, that the German and Dutch PTT, and the UK DTI use SRS news and Dr. Tim for a source of information.
[S.R.E.]

Hi,

before we rush off too fast here, I want to add something to this discussion -that in fact is needed for the survival of the Free Radio Scene. There is no difference between the hunting today, when stuff is published on the www and yesterday when the lists were published in different magazines. Only different editors to cary the dog head.

Yes - I'm very aware of the fact that the authorities know about the place to go to find lists with frequencies and stations names.

No - I will not agree that a printed magazine is safer. It's just a matter of time. And those guys have time on their side. If they wanted, 80% of all free radio stations would be raided during next week. But they aren't, beacuse they have time to wait for a suitable time.

I can only answer for the SRSnews, and this is facts;

* If a station doesn't want to appear on the www, we remove them. The subscribers via e-mail gets the full version.

* If news or equal is too hot, it's not published on the www.

* We can not, as AL wrote, check all frequencies to see if it's correct or not, I sometimes guess when I have a majority of one name and a few with another.

SRSnews is not to be seen as the 100% correct loglist, such thing doesn't exist. And I believe that this stands for the other mentioned sources.

If the operators believe that publishing logs officially on the www will harm them too much, I will of course change the routines for that, but as I have not received any clear yes or no in this matter, I continue as mentioned above.

I would like to get some feedback on this, directly or via SWpirates. But please, keep it realistic and do not just burst out. Letters including too many "fu**ing" and equal words are sent directly to the forgotten archive.

SRSnews has been on the net since 1994, and I do think that this was the first time I actually seen the lists mentioned together with a raid. BUT, have in mind, before the www lists - how many were raided / year? The same as now? Probably! So do not blame us completely - it is a dangerous hobby. And getting raided is one of the more negative side effects of it.

NEWS:

The proposed FRS 21st birthday broadcast is delayed for one week. Preparations are almost concluded, we are looking forward to the party.

Studio Northlight with a new adress. Also this station is now using the SRS-Germany Merseburg-adress:
P.O. Box 1136, 06201 Merseburg, Germany

Do you have a Shortwave pirates related webpage? Make sure to join our webring.
To join up go to <http://Q.webring.com/wrman?ring=swpirateswebring&addsite>

Some more around the dangerous lists etc etc:

Hello everybody,

After the raided of the mike radio saturdaynight, i think that are a lot of station they think that whe can use all the freq.in the 48m. But if you look in the klingenfuss CD that i have, we can not use all freq. Some freq are dangerous to use then for free radio stations. Also mike radio has use freq. that was not free say the r.c.d. man willem van essen.

greetings radio east coast holland.

-----: 0o0 :-----

Interesting comments about suggestions SRS publishing info/logs on Free Radio stations is a 'risk'.

FR Magazines publishing logs of SW FR stations have been around many years (my first copys from 1980!) so this info has always been available if PTT/DTI etc wanted to obtain and an electronic newsletter is no different. Besides how do you stop all types of dx magazines publishing FR logs such as BDXC 'Communications' mag ?

Besides the DTI/PTT could take out all or most of the SW FR stations anytime if they wanted to find the time to do this.(as you commented) The op of a SW tx is taking a risk by being on air....if such station ops are of a nervous disposition they should find another hobby.

from Ian Page of Radio Mirage (old station from the past now !)

-----: 0o0 :-----

Just a few words to the discussion about Free-Radio-news on the internet:

Certainly nobody can say that Radio Veronique or Mike Radio had been raided because of the reports about them on the internet. Both stations were amongst the most powerful stations on the shortwave and were furthermore on air very often.

Certainly there has been a kind of "internet-panic" in the last weeks. But undoubtedly the authorities can get some useful information from the web. The excellent knowlegde of the RDR-officer who visited Mike Radio about those sites is an evidence of that.

A try to make the internet a bit more safe could look like this: The news are sent out only by E-mail. On the web-site they are not available any more, or only by usin a password.

Of course this is a restriction of the freedom of information, which is not easy to accept for all of us. But in my opinion it's the only way to at least keep a minimum of control about who reads the news and who does not. It is already a success, when we do not make it too easy for the authorities. ***//S.D.***

NEWS:

According to the OP of Star Club Radio the new German station Radio Stoertebecker has been raided on Sunday 12:05 (local time.) The tx has been taken away. Radio Störtebecker did a live broadcast in the 48 m band on Sunday morning and announced a mobile number and the postal address in Gelsenkirchen several times.

==-----==
The OP of Radio East Side invited his friends as it seems and did an EAST SIDE BEER DRINKER show with Mr. Diebels and (the new) Mr Osama. The general themes were Afghanistan, beer and 'your last QSL'. Contact via Merseburg.

==-----==
Radio Paradise Int. has been heard on Sunday. The OP Nick gave his E-mail and phone number. He also promised, that the homepage will be online very soon. It is already prepared but not yet 'saved to the web'.

==-----==
Are there any free radio operators/stations planning on doing a special broadcast for the 100th anniversary of Marconi's first transatlantic radio transmission on 12 December??

Wouldn't it be a nice touch to hear a few stations on the air celebrating the event. Radio Amateurs are going to be having special QSOs using kite antennas (Marconi used a kite antenna to receive the "S,S,S" on that day long ago). Unfortunately the 12th is a Wednesday and not a Sunday. In any event, if any station is planning on going on the air during this historic anniversary, please drop me a line. Thanks. //73's//Dave (dvalko@floodcity.net)

==-----==
We are intending to have a radical change at Radio Ozone International, we have decided to trim some of our timing and open up new time slots and days of transmissions but we have to state here and now we do have interference problems at the transmitting site, once these are cured it will be all systems go. So here now is the plan: Friday evenings 01.00 to 04.00 BST on 5.800: Saturday evenings at 17.00 BST onwards on 5.830 or 5.800: Sunday mornings 07.30 to 10.30 BST on 7.490 and some tests on a Sunday afternoon quite possibly around 14.00 BST on 5.800. As always we look forward to your input on our output as well as reception reports, correct ones of course will be sent our QSL, but we need more from you than just reception reports, we need listeners. Prince Terry/Mr Ozone

==-----==
Radio City was heard in the USA some weeks ago. They have also an e-mail available: cityofthecars@yahoo.ca

==-----==
More addresses: Bandonica Radio does have a new email address. The old one does not work anymore. The new one is: bandonica@hotmail.com. Their webpage is still http://www.geocities.com/radio_bandonica/ and <http://www.listen.to/bandonica>

==-----==
A new page with UK-info: <http://www.conceptnews.net/>

More to the debate around "do not take my frequency"

==-----==
Considering the remark of Benelux Radio to disturb our signal when we will broadcast on 7480 kHz, we will increase our broadcasting power tremendously to minimize interference. The remark shows the arrogance of Benelux radio. Claiming a frequency is not tolerable. We call for all free radio stations to use the 7480 kHz frequency for their broadcasts. If we discover that we our broadcasts are being interfered we will increase our power every time we broadcast. One remark to benelux/crazywave. If a frequency is occupied move to another frequency. Just think about that. The fact that we were not make ourselves known and use an hotmail account has nothing to do with this. We don't have any bad intentions we just want to broadcast. The fact that we broadcast on 7480 kHz used to be for no particular reason. Things changed when radio stations (you know who we mean) started claiming this frequency as their own. //Radio Atlantis

QUESTIONNAIRE RESULTS

Here at long last are the results of the survey [SRS news # 40] that has been conducted since that bulletin, the results were quite low, we had replies via 20 e-mails - 4 letters - with 1 phone call, the highest response was from Germany and the lowest from the UK.

Answer to question # 1: It would seem that the age group of the listeners is around 45 years old, with the upper limits being from 23-73 years.

Answer to question # 2: Hard Rock-Soft Pop-C&W-Folk-Heavy Metal, [NO to Jazz or Blues] and it looks like that covers almost every type of music apart from Dutch barrel organ.

Answer to question # 3: Bands of the 1940s-Paul Simon-U2-Kate Bush-Suzanne Vega-Stephan Eicher-Madonna-Buddy Holly-anything from the 70s.

Answer to question # 4: 75% said "NO MORE CAROLINE/ RNI OR LAZER BUT FLASH BACKS PLEASE" which ties in with question # 5, listeners want to hear features on the smaller stations such as the forts, eg Radio 390-Sutch-BBMS-Radio City, stories such as what happened to the transmitting gear.

Answer to question # 6: 100% said "YES" but there should be loads of "Free Radio News" not just from the UK/Europe out look, but news from the Middle East-USA etc.

Answer to question # 7: 95% did not want a on air equipment swapping feature, but 5% said the swapping of offshore tapes recordings would be a good idea.

Answer to question # 8: A DX program !!! The answer was 100% ... NO.

Answer to question # 9: E-mails-Phone Calls-quicker response to letters, some said "How about a newsletter" in e-mail form, or by post.

Answer to question # 10: 100% said two hours on a Sunday morning starting at 07.00 UTC was not good after working all week, we the listeners should be able to relax of a Friday evening and tune in from 1900-02.00 UTC and may be catch the shows we missed on the Sunday afternoon say from 1300-1600 UTC.

Answer to question # 11: Stations as a DX catch !!! this depends on the distance and the hardship it takes to hear the station, eg 30 watts from Ireland into Europe is a "DX Catch" likewise 150 watts into the USA, which ties up with question # 12 QSL Cards we are told "Do not over estimate or under estimate their value, in years to come these are a great reminder as to the station, but it is worth remembering that a QSL comes only as a thank you, for the input to the output of the programming, it is not automatically sent.

Answer to question # 13: Strange as it may seem 95% said there shortwave listening was dying, not just towards the hobby pirate but as a whole.

So I end on a strange result and that is if 95% of you reported that your interest in shortwave [not just the hobby pirates] was dying why are you sending in logs !!!! It is hoped that stations reading this might now get their output aimed more towards the listeners !!!.

One other strange result was, music is out !!!, while speech is very much in, how you are going to fill that advice is not going to be easy, some will stay in their time warp thinking "This music is great you have to like it", some will try and change who knows.

I must now thank all those who took part in the questionnaire, names were many but I have selected a few outstanding replies these came from Ulf Ligander- Martin Schoech-Jonny @ SRS News-Vogelfreies Radio-Joe Vincent [JRRi]- Stan-Robbie-Pat-Dave Vickers-Chris Cortez-Save H-to name but a few.

//Thank you. //Gary Stevans for Prince Terry - Radio Ozone [Ireland]

NEWS:

VIRUS-ALERT!

Some of you might have received e-mail from AL, Bandonica and a few others. Thanks to the super virus carrier (Microsoft's Outlook Express and equal) the virus has been spread rather rapidly. The virus itself is a small px activated by the preview in Outlook and O. Express. Eudora and Pegasus-users are not affected. Use a good UPDATED Anti-Virus px like McAfee or Dr Salomon!

Radio Eastside still intends to close down. No more mail forwarding to him. But mail for Radio Powerplay can still be sent to Merseburg.

Radio MONO has been heard several times on saturday and sunday. The OP gave only Cologne as QTH, no phone/e-mail or address. Another new one from that area! The signal was extremely good, but the OP kept on complaining about problems with his microfone (tomorrow I'll buy a new one !) The program consisted mainly of long QSO's with additional music.

Radio TONAIR did a test on 6373.3 He did it there because he did not want to disturb others in the 48 m band (as he said on the phone). Well done !

49 METRE BAND CONGESTION

Since B-01 commenced, there has been a tremendous migration of European and Middle East broadcasters to the 49 mb, which equates to the frequency spectrum 5730-6295. The official "49 mb" extends from 5950-6200. However, WARC-92 has authorised operations in the range 5900-5950, provided that interference is not caused to other services, a frequency range which will not become officially available on an exclusive basis for broadcasting services until 2007. The ranges 5730-5900 and 6200-6295 may be used by broadcasting stations on a non-interference-basis at any time./Bob Padula

According to the 7 A.M. (GMT+2), 23 November English news from Kol Yisrael via the WRN ftp archive, the Attorney General has ruled that the government cannot promote domestic tourism via national religious pirate Arutz 7 (a7.org, israelnationalnews.com, israelnationalradio.org) I can't find a written story on the Jerusalem Post (jpost.com), Haaretz English (haaretzdaily.com) or Israel National News websites. (from Digest for swprograms@topica.com, issue 989)

NEWS:

Radio Mono announced an E-mail-address of radiomono@hotmail.com

Radio Pandora is given prize money away!

How it goes is: R.P. broadcast somewhere on 41 meter's and the listener has to ring in to claim his prize money! R.P. could be anywhere, i.e 7000 to 7600 kHz. So play the winning game.

Jens Martin of Benelux offered Atlantis the following deal:

BNL and CWR keep quite on 7480 the following two weeks to give Atlantis the chance to air a PROPER programme. If Atlantis claims this channel for its programmes - here is your chance, but we like to hear an interesting programme (not non stop mx with stolen jingles) where listeners have the opportunity to write in to a mailbox for getting a reply. Otherwise we will not accept Atlantis as a "real" free radio station. Do not play non stop mx as noone is interested in! Use own jingles and do not play BNL and CWR jingles. Show us that you are right !

Jens Martin & Chris Ise

BNL and CWR can be contacted over SRS Germany address.

NEWS:

RADIO TITANIC INTERNATIONAL - THE FINAL INFORMATION:

Due to circumstances beyond our control RADIO TITANIC INTERNATIONAL was forced to close down it's E-mail address TITANICRTI@aol.com. There will be no E-mail access to RTI for the time being.
At last, our oldish RTI homepage at the SRS Free Radio Hotel service closed down for good too.

Please delete your RTI entries from your mailing and bookmark lists. Thanks for all your stuff during the past years and thanks for having been with us.

Heaven knows what the future time may bring to us. You'll be informed somehow.
Merry Christmas and a healthy New Year 2002! God bless you!

Mark Brown for RTI

with final greetz to all of you and especially to Tim Cooper, Hank Somers and David Carmichael.

Radio Pandora will have to suspend transmissions for the time been. This is due to site problems.

KIPM has a homepage at <http://homepage.mac.com/KIPM>

And listeners should email: kipm_outerlimits@hotmail.com to contact Max. QSLs that are sent through the post to his PO drop box will get a full color QSL card (8.5" x 11" and awesome) and examples of these can be seen on the homepage. Listeners who would like to send email reception reports will get a e-QSL which is totally different and separate from the mailed items.

WEBMASTERS, PAY ATENTION!!!!

Here the SW pirates webring. <http://q.webring.com/hub?ring=swpirateswebring&id=1&hub>

NEWS:

Sorry for the delay, but my mail server had a bad day and crashed just before 17.00 UTC (when I pick up the mail for the first time on the day). I could not send or receive. But here we go again! Seems like there will be a looong X-mas! Maybe FR from Friday to Wednesday - what a weekend!!

As you might understand, SRSnews will not be published next Monday - by the time it's time to edit - I'm probably too drunk to do it, hi. I hope to be able to put the SRSnews 52 together on Thursday 27th - if you've sent any logs.

I wish You all a Merry Christmas!!

Radio Nova is now looking for German presenters for it's international service on shortwave. Any Germans who may be interested in preparing programmes for us should, in the first instance, contact us via our email address: RNISW@aol.com

Swinging Radio England raided

Here is the original email from Monday 17th Dec.: (via Free Radio News)

hello all

the bad news is that sre got busted last weekend at the sw and mw sites everything was taken tx compressors tape decks equalisers the lot this is a very unusual turn of events hence lack of back up equipment we really did not expect this anyway we will try to get back on for christmas if we can good luck to you all god bless and have a great christmas from all at sre

South America logs

December 23rd, 2001 (Sunday)

11440 khz, Radio Cochiguaz, 0223-0246++, programme, w/andean music, ID's as "Desde Sudamerica al mundo, Radio Cochiguaz" & "You are listening Radio Cochiguaz", also ID's in Quechua by lady annr. At 0243 ID with El Condor Pasa on background. SINPO: 35443.

NEWS:

Alfa Lima Int'l came in with a powerful signal and announced a web address of www.alfalima.net. T-shirts in XL-format are available for 10 USD or 25 Guilders. Address: P.O. Box 663, 7900 AR Hoogeveen, The Netherlands.

The UNID on 6240 on Christmas Day had heavy echo effects and played nonstop music. The song "We wish you a Merry Christmas" was played over and over again. The type of programme reminds of the format the Finnish pirates used years ago...

The Farmers from Holland were back on 6288 Christmas Day with a 200 W transmitter. They also announced a phone number. Despite the poor cxs on Christmas Day, they had a very strong signal...thank God not as powerful as a few years back, though.

Santa made it again this year with a late broadcast on Christmas Day on 6240. The programme featured the "rock'n'roll Santa Claus" with repeated attacks of coughing from a dirty chimney.

Radio Foxfire announced an e-mail address of radiofoxfire@hotmail.com.

BUGG Radio seems to be the name of a spoof (by Radio Torenvalk?). The programme featured a top 20 chart of Swedish orchestra music (so-called "bugg" in Swedish) with a DJ sounding like Donald Duck. The name "bugg" refers to a rock'n'roll-influenced dance which is only practiced in Sweden. Address: P.O. Box 94, 7038 ZH Zeddum, The Netherlands.

Classic Rock Radio featured rock music from the 80's including for instance Queen and ZZ Top. Address: P.O. Box 663, 7900 AR Hoogeveen, The Netherlands.

Radio Fusion Int'l was back for the first time in one year and featured fusion (jazz rock) music and greetings to Radio Torenvalk and members of the Malmö Short Wave Club in Sweden.

The final transmission this year from Studio Northlight is "ON AIR" at 30th December 2001 in the 48m-band from around 8 to 10 UTC on 6295 kHz. If the frequency is in use check 6306 or 6260 kHz. Some informations over the raid at 29th September this year are given and a lot of german, dutch and instrumental music is in the program. The complete playlist is 1 or 2 hours before on the webpage at <http://www.StudioNorthlight.de.vu> ! This station is also using now the SRS-Germany-adress at: Studio Northlight, P.O. Box 1136, 06201 Merseburg in Germany
The Hotline is 24 hours a day open, give me a call with greetings and reports to +49 162 6867417 !

// Greetings from Northlight

Radio Pandora is planning to use 7564 or 7555 kHz due to too much legal activities on 7.4 MHz.

The Voice Of The Netherlands and Radio Eastcoast Holland are "ON AIR" with the all-year Newyears-eve broadcast on 2 frequencies: 6285 and 7486 are planed for the 31st December 2001 starting at around 6.00 utc. The end is at around 14.30 utc! Power will be 150 watts on 48-and 800 watts on 41-metres. More info's are on the webpage at <http://www.geocities.com/eastcoastholland>

IRC's are gone!!

Yes, from January 1st 2002, it's not possible to buy IRC's. Post Offices around the world (within the Postal Union) will still give you stamps for them. No information available if there will be any kind of replacement. Euros, Dollars and stamps could be a replacement in the case of FR.

Next SRS-news (Issue 1 / 2002) will be out on Wednesday 2nd. From all here at SRS to all our readers, we want to wish you all and everyone a very good FR-year 2002!
